

## 2020 Wild Turkey Summer Survey Summary

### General Information

- Over 4,000 wild turkeys were reported from June 1 to August 31, 2020.
- Turkey observations were reported in 65 of 67 counties (none reported in Miami-Dade and Monroe counties)

### Information Obtained from Survey

- **Poults Per Hen** – this ratio gives an indication of overall productivity
- **Poults Per Brood** – this ratio gives an indication of poult survival
- **Percentage of Hens Observed with Poults** – indicates nesting success
- **Male to female ratio** – indicates the level of carryover of gobblers from the previous spring turkey hunting season

Table 1: 2020 Results from Florida Wild Turkey Summer Survey

	Poults per Hen	Poults per Brood	% Hens with a Brood	Male:Female ratio
North Central	2.38	3.95	66.52	0.33
Northeast	1.66	3.26	55.56	0.38
Northwest	2.21	4.24	66.11	0.36
South	1.42	3.24	56.69	0.53
Southwest	1.68	3.37	54.33	0.36
<b>Statewide</b>	<b>1.88</b>	<b>3.58</b>	<b>58.77</b>	<b>0.37</b>
