#### SUPPLEMENTARY INFORMATION:

#### Background

In response to the COVID–19 pandemic and the increased risk of spread of COVID–19 on cruise ships, HHS/CDC published an industry-wide No Sail Order on March 14, 2020, to, among other things, restrict the embarkation of cruise ships. CDC extended its No Sail Order, effective April 15, 2020, to require cruise lines, as a condition of obtaining controlled free pratique to operate in international, interstate, or intrastate waterways subject to the jurisdiction of the United States,<sup>1</sup> to develop appropriate plans to prevent, mitigate, and respond to the spread of COVID–19 on their cruise ships. Elsewhere in this issue of the **Federal Register**, CDC is publishing a companion notice announcing a further extension of the “No Sail Order and Suspension of Further Embarkation; Second Modification and Extension of No Sail Order and Other Measures Related to Operations.” This Request for Information requests comments from the public that will be used to inform future public health guidance and preventative measures relating to travel on cruise ships.

#### Public Participation

Interested persons or organizations are invited to participate by submitting comments specifically on the following questions related to planning and infrastructure, resumption of passenger operations, and summary questions raised in this document:

#### Planning and Infrastructure

1. Given the challenges of eliminating COVID–19 on board cruise ships while operating with reduced crew on board during the period of the April 15, 2020 No Sail Order Extension, what methods, strategies, and practices should cruise ship operators implement to prevent COVID–19 transmission when operating with passengers?

2. How should cruise ship operators bolster their internal public health programs with public health experts and invest in a robust public health infrastructure to ensure compliance with measures to detect, prevent, and control the spread of COVID–19?

3. How should cruise ship operators ensure internal public health programs
