SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau plans to request clearance from the Office of Management and Budget (OMB) for the collection of data concerning the Voting and Registration Supplement to be conducted in conjunction with the November 2020 CPS. The Census Bureau sponsors the supplement questions, which have been previously collected in November biennially since 1964. The current clearance expired August 31, 2019.

This survey has provided statistical information for tracking historical trends of voter and nonvoter characteristics in each Presidential or Congressional election since 1964. The data collected from the November supplement relates demographic characteristics (age, sex, race, education, occupation, and income) to voting and nonvoting behavior. The November CPS supplement is the only federal survey that provides a comprehensive set of voter and nonvoter characteristics. Federal, state, and local election officials use these data to formulate policies relating to the voting and registration process. Academic researchers, political party committees, think tanks, and other private organizations also use the voting and registration data.

II. Method of Collection

The voting and registration information will be collected by both personal visit and telephone interviews in conjunction with the November CPS interviewing. All interviews are conducted using computer-assisted interviewing.

SUPPLEMENTARY INFORMATION

I. Abstract

The New York City Housing and Vacancy Survey (NYCHVS) is sponsored by the New York City Department of Housing Preservation and Development and is conducted approximately every three years. The Census Bureau has conducted the survey for the City since 1962. The primary purpose of the survey is to measure the net rental vacancy rate, and describe the supply, condition, and continued need for rent control and rent stabilization. NYCHVS survey data are also used by policymakers, advocates, and researchers to inform policy and analyze housing costs and conditions in the City.

Detailed data from the survey cover many characteristics of the City's housing market, including characteristics of the City's population, households, housing stock, and neighborhoods. Data collected about each person in the household include housing costs and burden, income and employment, and key demographics, including membership in protected classes. On the household level, the NYCHVS collects data including total housing costs and income, public assistance, healthcare and childcare costs, and residential history. Data on the City's housing stock include building and unit quality and condition,

rent regulatory and homeownership status, and unit size and accessibility.

II. Method of Collection

We will attempt to collect all information via a computer-assisted personal interview in English, Spanish, Chinese (both Mandarin and Cantonese), Russian, Haitian Creole, or Bengali. However, upon the respondent's request, a telephone interview may be conducted. Interviews will be conducted with a knowledgeable adult in the household. In the event that the knowledgeable adult is unable to respond on behalf of another adult household member, we will make an effort to follow-up with the second household member to obtain more complete information. We will work to make sure that accommodations are made for respondents that require some form of modification to allow them to complete the interview.

III. Data

The core NYCHVS sample is longitudinal within each decade. The 2020 sample consists of approximately 30,000 housing units.

The Census Bureau releases the resulting survey estimates in non-identifiable microdata and select initial findings in tabular format. Both types of data are also made available to the general public through the Census internet site.

Certain Frozen Fish Fillets From the Socialist Republic of Vietnam: Corrected Notice of Court Decision Not in Harmony With Final Results of Administrative Review and Notice of Amended Final Results of Antidumping Duty Administrative Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On May 24, 2018, the United States Court of International Trade (CIT) issued a final judgment in *Vinh Hoan Corporation et al. v. United States*, Consol. Court No. 13-00156 (*Vinh Hoan*). On July 31, 2018, the Department of Commerce (Commerce) notified the public that the final judgment in that case is not in harmony with Commerce's final results of the underlying administrative review, and, as a result, it also amended the final results, involving the antidumping duty (AD) order on certain frozen fish fillets (fish fillets) from the Socialist Republic of Vietnam (Vietnam) covering the period of review (POR) August 1, 2010 through July 31, 2011. Commerce hereby amends the prior notice.

DATES: Applicable June 3, 2018.

SUPPLEMENTARY INFORMATION:

Background

On May 24, 2018, the CIT issued a final judgment in *Vinh Hoan*, sustaining Commerce's remand results for the eighth administrative review of the AD order on fish fillets from Vietnam covering the POR August 1, 2010 through July 31, 2011. On July 31, 2018, Commerce notified the public that the final judgment was not in harmony with the final results of that administrative review.¹ As a consequence, Commerce also amended the final results of the eighth administrative review. However, in the *First Timken Notice*, Commerce inadvertently published incorrect weighted-average dumping margins for all companies except Vinh Hoan Corporation.² As such, we have corrected these rates in the chart below.

Amended Final Results

Commerce is amending the *First Timken Notice* with respect to all companies in the review except Vinh Hoan Corporation. The revised weighted-average dumping margins for these exporters during the period August 1, 2010 through July 31, 2011 are as follows:
