## Overview

Washington State Ferries is incrementally increasing service to meet increasing demand as the ferry system continues to recover from the pandemic. A return to full capacity of the system is dependent on several variables, including:

- The trajectory of the pandemic and ongoing impacts of COVID-19 on the workforce.
- Ridership levels and accommodating the seasonal increase in summer peak season ridership.
- The ability of WSF to recruit, hire and train new employees to fill key positions.
- The rate of retirements and other separations that contribute to overall staffing levels.
- Lack of vessels due to unanticipated breakdowns and an aging fleet.

## Progress toward reaching targeted staffing levels

## Service Restoration Process

## Ferry Service Restoration

WSF has prioritized ferry routes based on ridership, service performance, availability and directness of travel alternatives, and vessel and crew availability.

### Upcoming service changes

- The Seattle/Bainbridge route has completed one week of its Trial Service Stage that started on March 22. WSF is monitoring the route's reliability closely and once it reaches 95% reliability for a three-week monitoring period, WSF will announce it fully restored.
- Spring season begins April 10

### Service Reliability

During the trial stage, WSF's target is 95% reliability over three weeks before considering the route fully restored. This chart illustrates current reliability for all routes based on a regular schedule.
