

What can I do today?

This week it is ...shoes

Tuesday

Shoe maths

- Look in shoes for different numbers. What numbers can you find?
- Gather a group of shoes and sort them, you could sort them by size, type, colour, fastening type, number of eyelets.
- You could measure shoes using Lego or Duplo bricks. Make a tower the same length as your shoe. How many bricks long is your shoe?
- For older children, pairs of shoes are a good way to introduce counting in twos.
