**What can I do
today?**

This week it is ...crayons

Thursday

Crayons for little hands

- Crayons are often the first drawing tool we give to our children as they don't take as much pressure as pencils and are less messy than felt tips!
- Crayons are often thicker for little hands to grip in a palmer grasp. If you don't have any thick crayons why not try to tape a few together. Not only will they be easier to hold for little hands, but they will leave multiple rainbow marks!
