

Get2Green wants to help you and your students connect to the Chesapeake Bay!

*Join the Chesapeake Bay Foundation and colleagues for **Fostering a Sense of Place through Outdoor Investigations: Northern Virginia from July 18 –22, 2022**. Get2Green is able to provide a limited number of full scholarships for K-12 FCPS educators to participate in this historically very popular and engaging CBF course. In order for Get2Green to pay for your participation, you must **fill out this google form to secure your spot**. Get2Green will complete your registration with CBF. We cannot reimburse you if you self-register with CBF.*

Course Description: How do our actions in Northern Virginia impact the Potomac River and the Chesapeake Bay? Educators throughout NOVA are invited to participate in this field-based outdoor investigation of water quality and ecology to answer this question and more. Spend the first two days of the course exploring local neighborhoods and waterways. Then travel to Smith Island to investigate connections to this Chesapeake Bay island community and ecology. Participants will develop the skills and confidence to lead students in Meaningful Watershed Educational Experiences while learning outside with peers and colleagues.

Length & Location: Five consecutive days (July 18-22) of field-based, whole-group, outdoor investigations: Monday and Tuesday in the Northern Virginia Area, Wednesday through Friday at CBF's Smith Island Education Center as a 3-day, 2-night dormitory-style experience.

These courses are often very popular, and CBF limits the number of participants. Please complete the google form and we will secure your spot and confirm your participation once we are able to finalize your registration.
