

COVID-19: summary of persons monitored, persons tested, and cases

Data through Aug 26, 2020 verified as of Aug 27, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

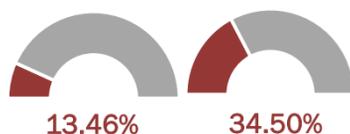

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation

Total reports	197,593
Total persons of high, medium, or unknown risk	193,932
High/medium/unknown risk still being monitored	12,918

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

	Florida residents	Non-Florida residents
Total tested	4,504,911	19,292
Positive	605,342	6,649
Negative	3,892,752	12,621
Inconclusive	6,817	22
Awaiting testing	3,445	28

Cumulative percent positivity (based on positive and negative results from March 1 - present)

Cases: people with positive PCR or antigen test result

Total cases	611,991
Florida residents	605,342
Non-Florida residents	6,649

Type of testing	
Florida residents	605,342
Positive by BPHL/CDC	21,768
Positive by commercial/hospital lab	583,574
PCR positive	597,508
Antigen positive	7,834
Non-Florida residents	6,649
Positive by BPHL/CDC	231
Positive by commercial/hospital lab	6,418
PCR positive	6,413
Antigen positive	236

Characteristics	
Florida residents hospitalized	37,718
Florida resident deaths	10,868
Non-Florida resident deaths	143

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm.

Risk factors for Florida residents	
Traveled	4,657
Contact with a known case	199,468
Traveled and contact with a known case	4,878
Neither	396,339
No travel and no contact	71,477
Travel is unknown	243,327
Contact is unknown	142,518
Contact is pending	166,218

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

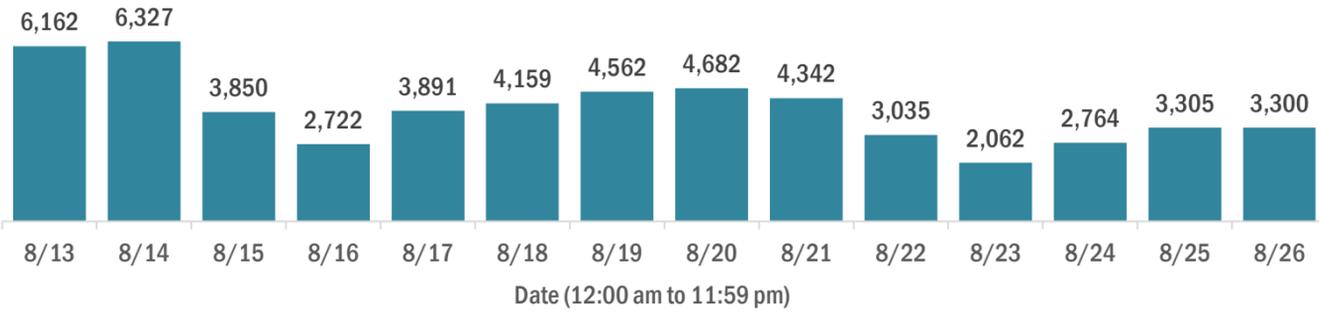

COVID-19: cases and laboratory testing over time

Data through Aug 26, 2020 verified as of Aug 27, 2020 at 09:25 AM

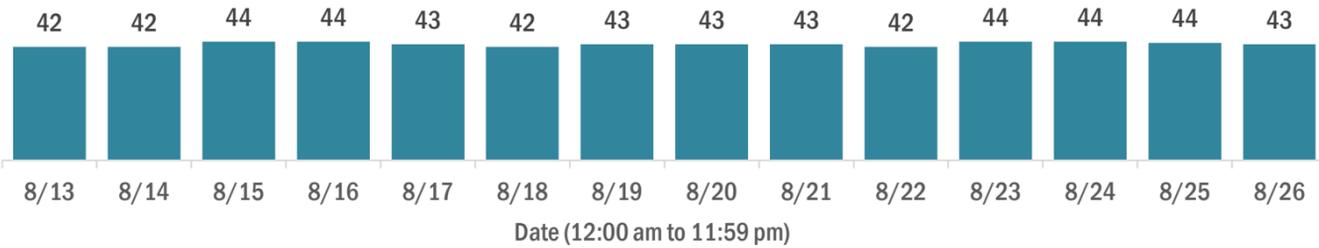

Data in this report are provisional and subject to change.

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

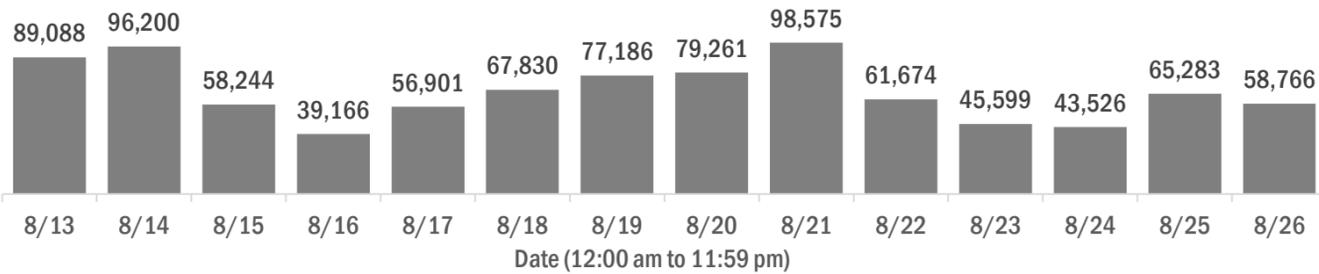

Median age of cases by day

Laboratory testing for Florida residents over the past 2 weeks

Number of Florida residents tested per day

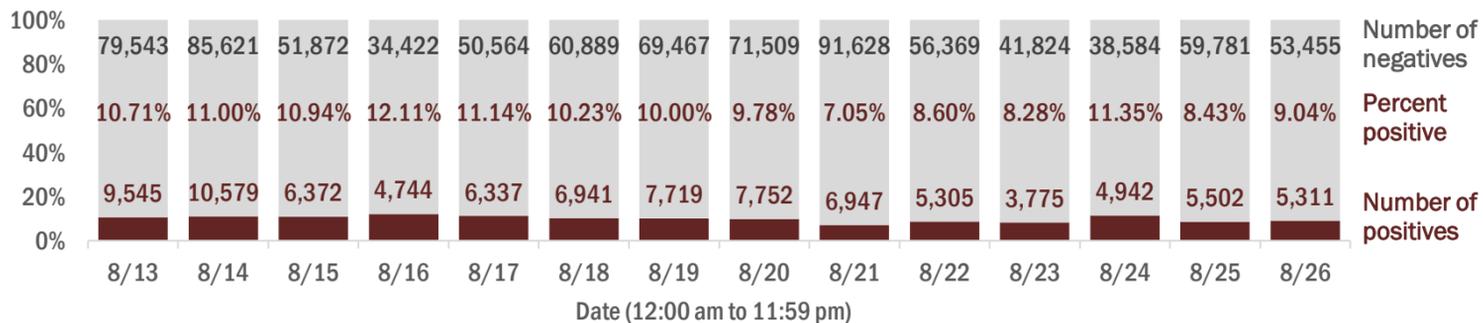

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 7.05% to 12.11% over the past 2 weeks and was 9.04% yesterday.

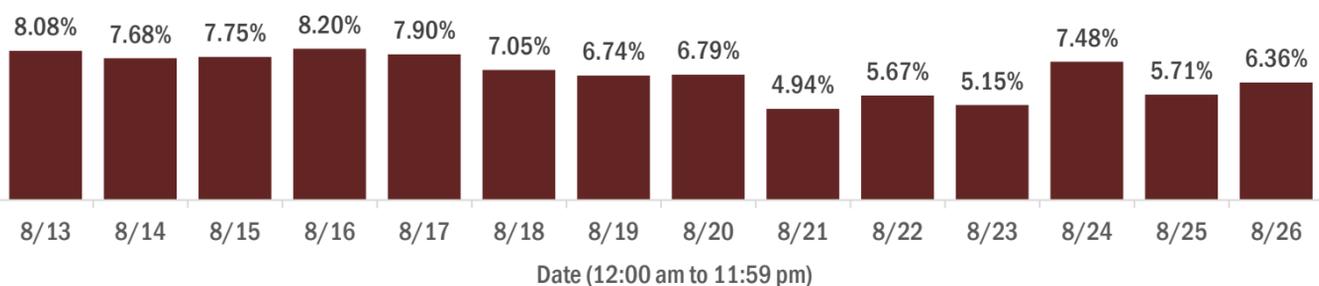

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases in Florida residents

The percent of positive results ranged from 4.94% to 8.20% over the past 2 weeks and was 6.36% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

COVID-19: characteristics of 605,342 Florida resident cases

Data through Aug 26, 2020 verified as of Aug 27, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

COVID-19: testing by laboratory

Data through Aug 26, 2020 verified as of Aug 27, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Aug 26, 2020 verified as of Aug 27, 2020 at 09:25 AM

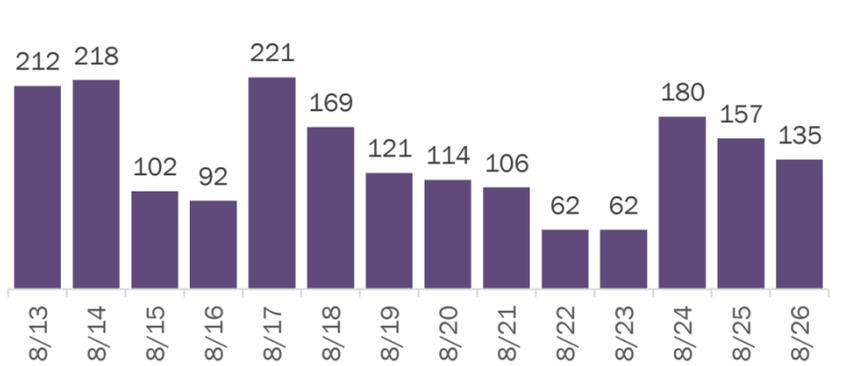

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
