

## 2021 Merit-based Incentive Payment System (MIPS) Quality Performance Category Data Validation Information

This memo provides information to users looking for more information related to the 2021 Quality performance category's data validation criteria.

For the 2021 performance period, please refer to the quality measure specifications and corresponding supporting documents within a collection type for the criteria used to determine the appropriate patient population (denominator) and quality action (numerator) for each selected quality measure. These documents should be used to provide the details required in order to validate the data submitted for the MIPS Quality performance category. Supportive medical record and coding (Healthcare Common Procedure Coding System [HCPCS], Current Procedural Terminology [CPT], International Classification of Diseases, Tenth Revision [ICD-10], etc.) documentation maybe requested by Centers for Medicare & Medicaid Services (CMS) to support data validation. Coding applicable to each measure is provided in the 2021 Medicare Part B Claims Measure Specifications, Clinical Quality Measure (CQM) Specifications, eCQM Specifications, CMS Web Interface Measure Specifications and Supporting Documents. The measure specifications and supporting documents are the best resource to use to validate data related to each quality measure.

The MIPS Quality performance category's quality measure specifications can be found on the [Quality Payment Program Resource Library](#). Please select the appropriate zip file based on your collection type:
