

COVID-19 Breakthrough Report

Oregon's Weekly Surveillance Summary

Breakthrough case report - November 24, 2021

Background

Data for the weekly breakthrough case report will include data through the most recent Sunday and the report will be published on Thursdays.¹ Vaccine breakthrough cases are defined as instances in which an individual tests positive for COVID-19 at least 14 days following the completion of any COVID-19 vaccine series.² Vaccine breakthrough cases that result in hospitalization or death are reported to CDC.

This report includes only those vaccine breakthrough cases which are reported to public health following a positive test result. Many vaccine breakthrough cases are believed to experience no symptoms or minimal symptoms.³ These cases are unlikely to undergo testing for COVID-19 and be reported to public health. Therefore, the true number of vaccine breakthrough cases is unknown.

COVID-19 cases in vaccinated and unvaccinated people

Weekly summary

During the week of November 14–November 20, there were 5,875 cases of COVID-19. 4,203 (71.5%) were unvaccinated and 1,672 (28.5%) were vaccine breakthrough cases. The median age of breakthrough cases was 46 years. 28 (1.7%) breakthrough cases were residents of care facilities, senior living communities or other congregate living settings. 345 (20.6%) cases were 65 or older. There were 71 (4.2%) cases aged 12-17.

OHA publishes the most up-to-date information about cases from the most recently completed MMWR week. However, not all information about a case's vaccination status may be available at the

¹ The weekly summary, Figure 1, and Figure 2 use the date that cases are reported to OHA, to provide information on the most recently identified cases. All other dates in this report use specimen collection date to align with the breakthrough case definition.

² This definition is consistent with the CDC's definition, available here: <https://www.cdc.gov/vaccines/covid-19/downloads/COVID-vaccine-breakthrough-case-investigations-Protocol.pdf>

COVID-19 Breakthrough Report

Oregon's Weekly Surveillance Summary

time of publication. Table 1 includes updated totals of COVID-19 cases by vaccine breakthrough status for the previous six weeks.

Table 1. COVID-19 cases by vaccine breakthrough status over the previous 6 weeks

MMWR week ending	Total cases	Breakthrough cases	Percent breakthrough case
2021-10-16	8,398	2,298	27.4
2021-10-23	7,701	2,285	29.7
2021-10-30	8,225	2,403	29.2
2021-11-06	6,759	2,104	31.1
2021-11-13	5,906	1,704	28.9
2021-11-20	5,875	1,672	28.5

Cumulative summary

Overall, there have been 43,398 vaccine breakthrough cases identified in Oregon. The median age of breakthrough cases is 48 years (range: 11-106). 1,558 (3.6%) breakthrough cases were residents of care facilities, senior living communities or other congregate living settings. 10,461 (24.1%) cases were 65 or older. There have been a total of 1,201 (2.8%) cases aged 12-17. Breakthrough cases have been reported in all 36 counties.

Cases of COVID-19 are much more common in unvaccinated⁴ individuals than in vaccinated individuals (Figure 1). The rate of COVID-19 cases among unvaccinated individuals in the most recent week was more than 4 times the rate of COVID-19 cases among those who are fully vaccinated. Community spread remains elevated throughout the state and is particularly high in areas with lower vaccination rates. As COVID-19 cases have increased across Oregon, vaccine breakthrough cases have also increased, but at a much lower rate than in the unvaccinated. Vaccination remains the most effective tool to reduce the spread of COVID-19.

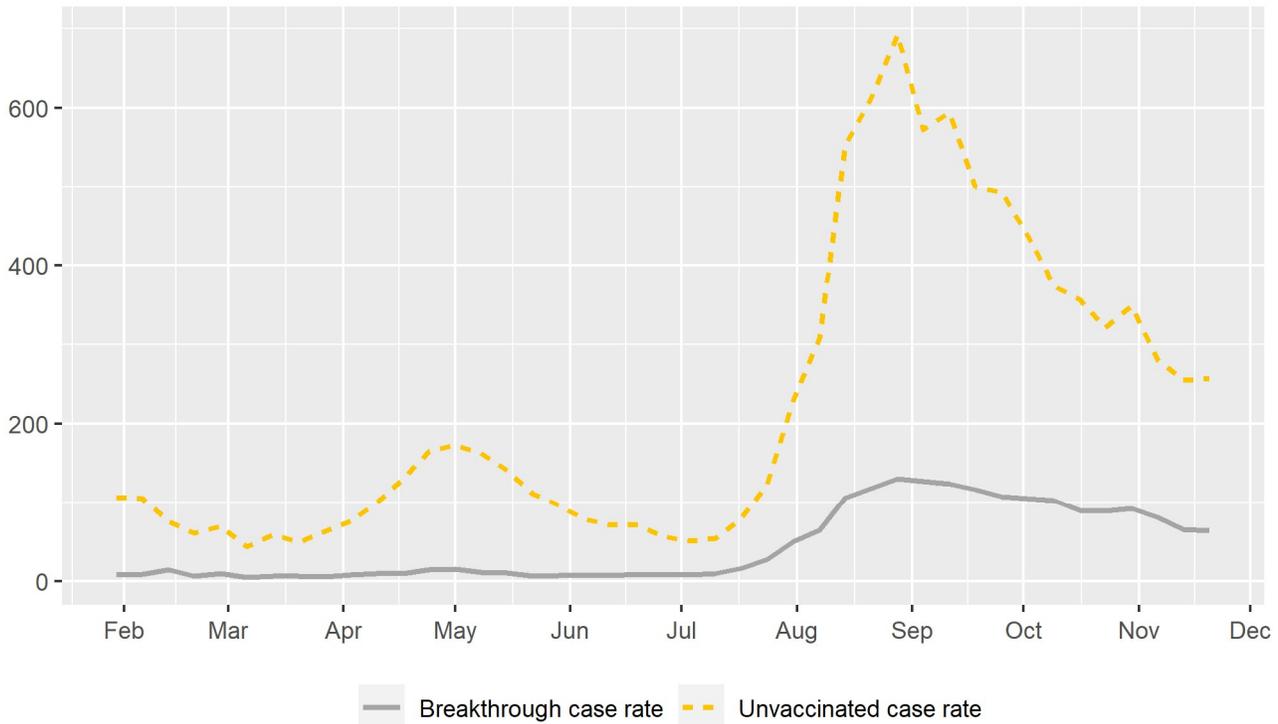

⁴ Unvaccinated persons are defined as people who have not received an approved COVID-19 vaccine, or who have not completed a COVID-19 vaccine series.

COVID-19 Breakthrough Report

Oregon's Weekly Surveillance Summary

Figure 1. COVID-19 cases per 100,000 per week, by vaccination status

Vaccine breakthrough cases and severity

The Pfizer, Moderna and Johnson & Johnson COVID-19 vaccines are all highly effective at preventing severe COVID-19 illness and death. Table 2 includes totals of breakthrough cases by vaccine manufacturer and severity. Relatively few breakthrough cases have been hospitalized, and even fewer have died (Figure 2).⁵

⁵ A death is considered to be related to COVID-19 in any of the following circumstances: a) death of a confirmed or probable COVID-19 case within 60 days of the earliest available date among exposure to a confirmed case, onset of symptoms, or date of specimen collection for the first positive test; b) death from any cause in a hospitalized person during admission or in the 60 days following discharge AND a COVID-19-positive laboratory diagnostic test at any time since 14 days prior to hospitalization; or c) death of someone with a COVID-19-specific ICD-10 code listed as a primary or contributing cause of death on a death certificate, regardless of the dates of diagnosis or death

COVID-19 Breakthrough Report

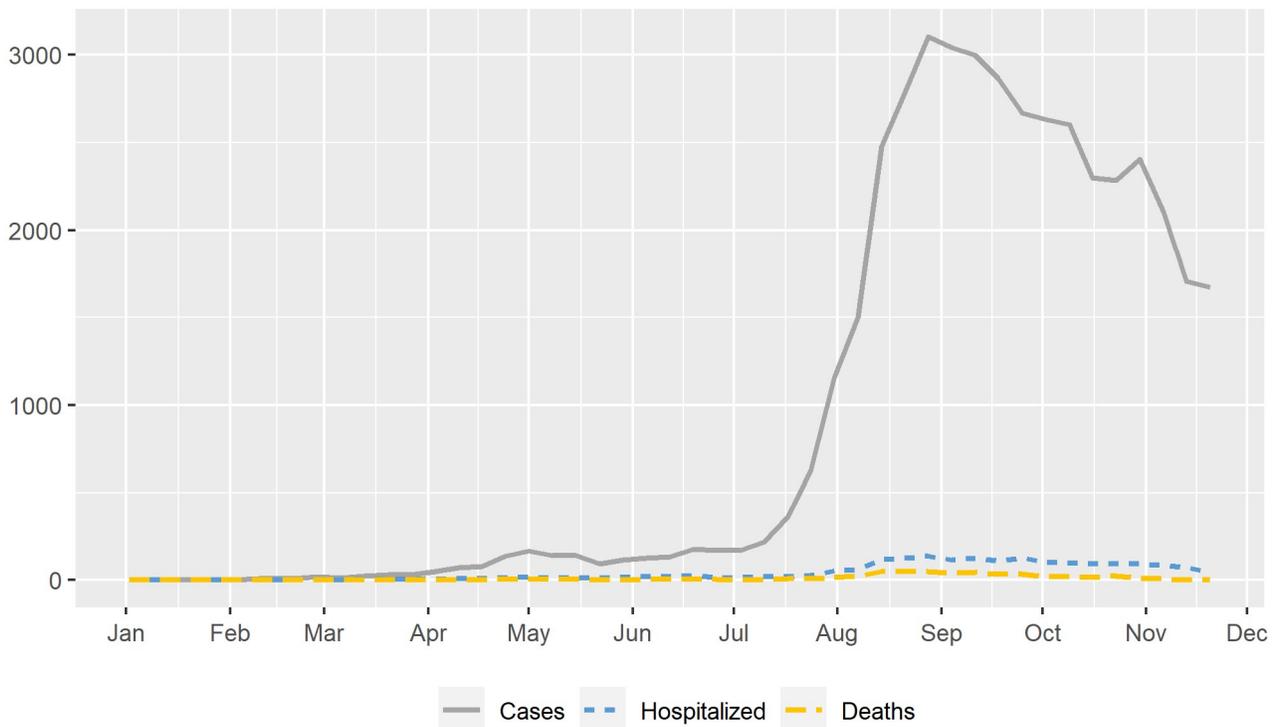

Oregon's Weekly Surveillance Summary

Table 2. COVID-19 Breakthrough cases by vaccine manufacturer and severity⁶

Vaccine manufacturer	Primary series completed	Cases	Hospitalizations	Deaths	Cases per 100,000 vaccinated
Pfizer	1,479,122	21,887	836	256	1,479.7
Moderna	936,120	11,701	529	134	1,249.8
Johnson & Johnson/Janssen	230,216	5,249	277	71	2,280.0

Figure 2. COVID-19 breakthrough cases, hospitalizations and deaths, by week

⁶ Table 2 provides the number of cases per 100,000 vaccinated individuals by vaccine manufacturer. Because this figure does not account for the time that each person has been fully vaccinated, it is not a true rate and should not be interpreted as such.

COVID-19 Breakthrough Report

Oregon's Weekly Surveillance Summary

To date, 4.4% of all known breakthrough cases have been hospitalized (n=1,917), and only 1.2% have died (n=513).⁷ The median age of the people who have died is 81 (range: 34-103). It is important to note that not all vaccine breakthrough cases are reported to public health, which may cause the proportions in the following section to appear higher than in reality. These figures are not vaccine breakthrough hospitalization or death rates and should not be interpreted as such.

Tables 3, 4 and 5 provide detailed vaccine breakthrough severity data by age, race and ethnicity. Both the risk of hospitalization and death increase with age.

Table 3. COVID-19 breakthrough cases by age group and severity

Age group	Breakthrough cases	Breakthrough hospitalizations	Breakthrough deaths
12-19	2,070	14	0
20-29	5,997	38	0
30-39	7,618	59	2
40-49	7,366	92	8
50-59	6,707	179	18
60-69	6,179	380	77
70-79	4,559	539	138
80+	2,902	616	270
Total	43,398	1,917	513

⁷ Cumulative deaths reported here reflect all breakthrough cases known to have died since January 1, 2021. There may be a lag of several weeks between when an individual dies and when their death appears in this report. Increases in cumulative deaths between this and subsequent reports should not be interpreted as individuals who have died within the past week.

COVID-19 Breakthrough Report

Oregon's Weekly Surveillance Summary

Table 4. COVID-19 breakthrough case severity by race⁸

Race	Cases	Hospitalizations	Deaths
> 1 race	403	13	2
American Indian/Alaska Native	572	26	6
Asian	999	33	12
Black	664	44	9
Not Available	10,791	252	115
Other	3,117	107	36
Pacific Islander	98	4	1
White	26,754	1,438	332
Total	43,398	1,917	513

Table 5. COVID-19 breakthrough case severity by ethnicity

Ethnicity	Cases	Hospitalizations	Deaths
Hispanic	3,212	80	13
Not Hispanic	22,590	1,217	284
Unknown	17,596	620	216
Total	43,398	1,917	513

⁸ During the case investigation, people are asked to self-report their race, ethnicity, tribal affiliation, country of origin, or ancestry. As of October 2021, 42,423 (80.8%) of the 52,483 persons who identify as "Other" race also self-identify as Hispanic or Latino.

COVID-19 Breakthrough Report

Oregon's Weekly Surveillance Summary

Table 6 provides the proportion of vaccine breakthrough cases who have died with COVID-19. Approximately 80% of vaccine breakthrough deaths have occurred in patients 70 years and older. The proportion of vaccine breakthrough cases who have died with COVID-19 has increased over time. This trend is likely multifactorial and may be associated with increased COVID-19 transmission in our communities, increased disease severity associated with infection caused by the Delta variant and waning immunity over time in elderly populations.

Table 6. COVID-19 deaths by month, by breakthrough case status⁹

Month	Total COVID-19 deaths	Vaccine breakthrough deaths	Percent vaccine breakthrough deaths
March 2021	122	4	3.3
April 2021	111	6	5.4
May 2021	212	19	9.0
June 2021	108	15	13.9
July 2021	92	16	17.4
August 2021	573	127	22.2
September 2021	839	176	21.0
October 2021	452	120	26.5

⁹ Data in Table 6 will be updated monthly and will reflect cases from the previous month.

COVID-19 Breakthrough Report

Oregon's Weekly Surveillance Summary

COVID-19 variants

Table 7. COVID-19 breakthrough cases associated with variants of concern¹⁰

Overall, approximately 6.9% of positive specimens in Oregon have been sequenced. Delta is currently the dominant variant circulating in Oregon. At this time, vaccine breakthrough cases appear to reflect the variants circulating in the community. Additional information on variants can be found here: <https://public.tableau.com/app/profile/oregon.health.authority.covid.19/viz/GISAIDVariantDashboardUpdated/OregonVariantDashboard>

Subtype	Cases
Delta (B.1.617.2)	1,674

Table 8. COVID-19 breakthrough cases associated with variants being monitored

Subtype	Cases
Alpha (B.1.1.7)	149
Beta (B.1.351)	16
Gamma (P.1)	62
Epsilon (B.1.427/B.1.429)	38
Iota (B.1.526)	29

¹⁰ As of September 29, OHA will align with CDC's classification of SARS-CoV-2 variants. Variant classification scheme defines four classes of SARS-CoV-2 variants: variants of concern, variants of interest, variants being monitored, and variants of high consequence. Delta is currently the only variant of concern in the United States.

COVID-19 Breakthrough Report

Oregon's Weekly Surveillance Summary

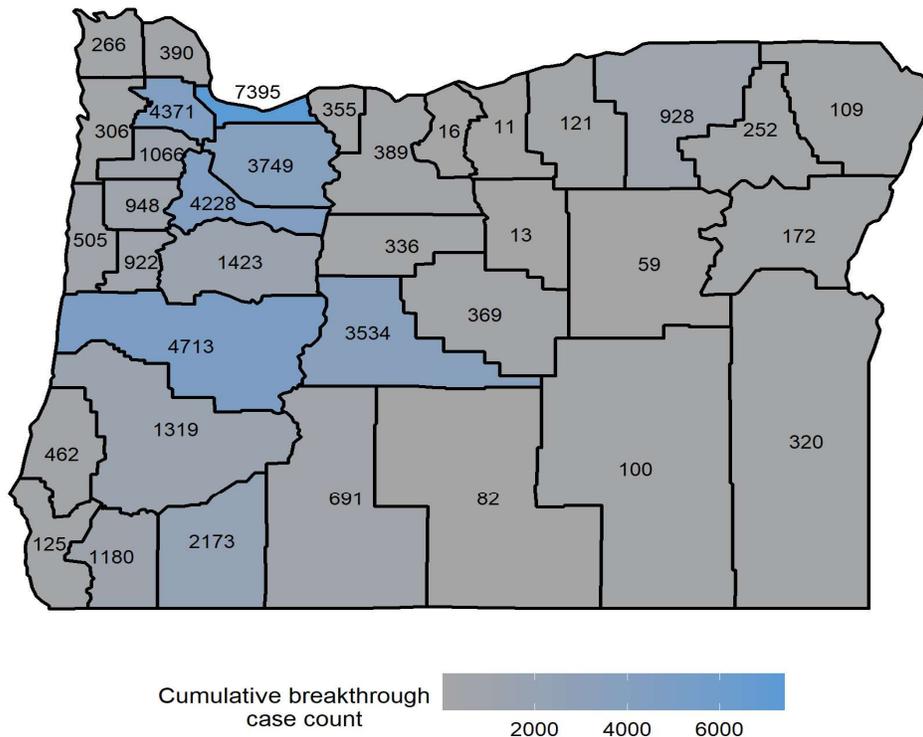

Breakthrough cases by county

Figure 3 and Table 9 show breakthrough cases by county. In general, cumulative breakthrough case counts correspond with the population size of each county. Additional information on cumulative cases can be found here:

<https://public.tableau.com/app/profile/oregon.health.authority.covid.19/viz/OregonCOVID-19TestingandOutcomesbyCounty/OregonsCOVID-19TestingandOutcomesbyCounty>

Table 9 provides both cumulative and weekly data. The “Cases in previous week” column references the number of vaccine breakthrough cases newly reported between November 14 and November 20. This count may not reflect the full number of vaccine breakthrough cases that occurred during this time, as breakthrough case ascertainment can lag by several weeks.

Figure 3. Map of COVID-19 breakthrough case cumulative counts, by county of residence¹¹

¹¹ Counties that have a total of fewer than 10 cases will appear grey without a data label.

COVID-19 Breakthrough Report

Oregon's Weekly Surveillance Summary

Table 9. COVID-19 breakthrough cases by county of residence¹²

County	Cumulative cases	Cases in previous week
Baker	172	1-9
Benton	922	47
Clackamas	3749	189
Clatsop	266	1-9
Columbia	390	17
Coos	462	16
Crook	369	22
Curry	125	1-9
Deschutes	3534	151
Douglas	1319	58
Gilliam	11	0
Grant	59	1-9
Harney	100	1-9
Hood River	355	21
Jackson	2173	95
Jefferson	336	14
Josephine	1180	30
Klamath	691	33
Lake	82	1-9

¹² Counties that have a total of fewer than 10 cases will be reported as 1-9 cases.
