

non-NRDA funding to construct the breakwater system that was originally proposed as a component of the Cypremort Improvements project. The Louisiana TIG prepared a Draft Supplemental Restoration Plan and Environmental Assessment for the Cypremort Point State Park Improvements Project Modification (Draft Supplemental RP/EA) to inform the public about potential modifications to the Cypremort Improvements project and to seek public comment. A Notice of Availability of the Draft Supplemental RP/EA was published in the **Federal Register** at 85 FR 21852 on April 20, 2020. The Louisiana TIG hosted a public webinar on April 28, 2020, and the public comment period for the Draft Supplemental RP/EA closed on May 20, 2020. The Louisiana TIG considered the public comments received on the Draft Supplemental RP/EA, which informed the Louisiana TIG's analyses and selection of the modified Cypremort Improvements project in the Final Supplemental RP/EA. A summary of the public comments received and the Trustees' responses to those comments are included in Section 6 of the Final Supplemental RP/EA.

Overview of the Final Supplemental RP/EA

The Final Supplemental RP/EA evaluates modifications to the Cypremort Improvements project and considers three action alternatives, consistent with the purpose and need of the original project. Alternative A includes the components of the original Cypremort Improvements project that were approved for funding but are not currently completed: Improvements to an existing rock jetty, beach reclamation, construction of a marsh boardwalk and trail, and road and parking lot repairs. Alternative B includes the same components as in Alternative A as well as additional improvements at Cypremort Point State Park: A recreational vehicle campground with approximately 30 new paved pull-through campsites with sewer, water, and electrical tie-ins, two mobile bathhouses with sewer, water, and electrical tie-ins, and a boat dock/fishing pier. Alternative C includes the same components as Alternative B but eliminates the mobile bathhouses. In the Final Supplemental RP/EA, the Louisiana TIG selects project Alternative B: Expanded Restoration and Recreation Improvements with Mobile Bathhouses. The estimated total cost of the selected project, as modified, is \$4.48 million. In the Final Supplemental RP/EA, the Louisiana TIG presents to the public its plan to

continue the process of restoring recreational use services lost in the Louisiana Restoration Area as a result of the *Deepwater Horizon* oil spill. Additional restoration planning for the Louisiana Restoration Area will continue.

Data collection has been delayed due to the COVID–19 pandemic and will not be complete by the current expiration date of October 31, 2020. There are no changes proposed to the current instruments.

DATES: *Comments due within 60 days of publication.* In compliance with the requirements of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, ACF is soliciting public comment on the specific aspects of the information collection described above.

Administration for Children and Families, Office of Planning, Research, and Evaluation, 330 C Street SW, Washington, DC 20201, Attn: OPRE Reports Clearance Officer. All requests, emailed or written, should be identified by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: Through AMCS, ACF seeks to learn more about how states and communities coordinate early care and education, family economic security, and/or other health and human services to most efficiently and effectively serve the needs of low-income children and their families. ACF aims to understand strategies used to support partnerships, including the Federal barriers to agency collaboration. In support of achieving these goals, the study team is conducting “virtual site

visits” with six programs that offer coordinated services. The study team will gather information through interviews with program staff members, such as agency leaders or frontline staff, and focus groups with parents.

Data collection activities will include up to six program “virtual site visits.” “Virtual site visits” include semi-structured interviews with up to 30 total staff at each site and focus groups with 8–10 parents at each site. Semi-structured interviews with program and partner staff will obtain in-depth information about the goals and objectives of programs, the services provided, how the coordinated services are implemented, how staffing is managed, data use, and any facilitators and barriers to coordination. Focus groups with parents participating in the program will provide the opportunity to

learn about how parents perceive the program; how it meets their needs; what benefits they gain from the program; and how they enroll, participate, and progress through the program.

Respondents: Lead program and partner program staff members working in six programs across the United States that coordinate early care and education services with family economic security services and/or other health and human services, as well as parents receiving services from these programs. Staff respondents will be selected with the goal of having staff represent each level of the organization. Parents who have participated in the program for at least 6 months and who receive early childhood services and at least one other program service will be invited to participate in focus groups.
