All requests and submissions should be identified by the title of the information collection.

**SUPPLEMENTARY INFORMATION:**

**Description**

A “For Comment” version of the draft format for use in submission of interim and final Progress Reports is posted on the EAC website at: <https://www.eac.gov/payments-and-grants/reporting>. The PR will directly benefit

award recipients by making it easier for them to administer Federal grant and cooperative agreement programs through standardization of the types of information required in progress reports—thereby reducing their administrative effort and costs.

After obtaining and considering public comment, the EAC will prepare the format for final clearance. Comments are invited on (a) ways to enhance the quality, utility, and clarity of the information collected from respondents, including through the use of automated collection techniques or other forms of information technology; and (b) ways to minimize the burden of the collection of information on respondents, including through the use

of automated collection techniques or other forms of information technology.

The EAC proposes to collect program progress data for HAVA grantees building upon the emergency approved form OMB Control No: 3265-0020 for the HAVA CARES Act Progress Reports. EAC will use this data to ensure grantees are proceeding in a satisfactory manner in meeting the approved goals and purpose of the project.

The requirement for grantees to report on performance is OMB grants policy. Specific citations are contained in part 200, “Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards.”

**Respondents:** All EAC grantees and state governments.

## DEPARTMENT OF ENERGY

## Energy Information Administration

## Agency Information Collection

**AGENCY:** U.S. Energy Information Administration (EIA), U.S. Department of Energy (DOE).

**ACTION:** Notice and request for OMB review and comment.

**SUMMARY:** EIA reinstates the *Residential Energy Consumption Survey* (RECS), with changes, under OMB Control Number 1905–0092, as required by the Paperwork Reduction Act of 1995. RECS collects data on energy characteristics, consumption, and expenditures for the residential sector of the United States. This collection is comprised of five forms including: Form EIA 457–A *Household Survey*, Form EIA 457–D *Energy Supplier Survey: Household Propane Usage*, Form EIA 457–E *Energy Supplier Survey: Household Electricity Usage*, Form EIA 457–F *Energy Supplier Survey: Household Natural Gas Usage*, and Form EIA 457–G *Energy Supplier Survey: Household Fuel Oil/Kerosene Usage*.

**DATES:** Comments regarding this information collection must be received on or before July 17, 2020.

**ADDRESSES:** Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to <https://www.reginfo.gov/public/do/PRAMain>. Find this particular information collection by selecting “Currently under 30-day

Review—Open for Public Comments” or by using the search function.

And send a copy to: James Berry, Survey Manager, 1000 Independence Avenue, SW, EI–22, U.S. Energy Information Administration, Washington, DC 20585, or by email at [james.berry@eia.gov](mailto:james.berry@eia.gov).

**FOR FURTHER INFORMATION CONTACT:**

James Berry at 202–586–5543 or by email at [james.berry@eia.gov](mailto:james.berry@eia.gov). The forms are available online at: <http://www.eia.gov/survey/#eia-457>.

**SUPPLEMENTARY INFORMATION:** This information collection request contains:

- (1) OMB No.: 1905–0092;
- (2) *Information Collection Request Title:* EIA–457A, D, E, F, G, 2020 *Residential Energy Consumption Survey*;
- (3) *Type of Request:* Reinstatement with changes of a previously approved collection;
- (4) *Purpose:* RECS collects information on energy use in housing units and includes a series of data collections from households and household energy suppliers. RECS data are used to generate official statistics about the energy characteristics, consumption, and expenditures of U.S. homes. EIA has conducted the RECS periodically since 1978 and the 2020 RECS will be the 15th data collection for the program.

Form EIA 457–A *Household Survey* collects information on the presence and characteristics of a wide range of energy consuming devices in homes, including heating and cooling equipment, appliances, and electronics. The *Household Survey* also asks respondents about key structural features and demographic characteristics that impact energy usage. Forms EIA 457–D, E, F, and G are

*Energy Supplier Surveys*. These surveys collect monthly electricity and natural gas billing data from household survey respondent energy suppliers (e.g., utilities), and periodic propane and fuel oil delivery data from bulk fuel suppliers.

RECS is integral part of EIA’s mandate to collect and publish energy end-use consumption data, and the program represent the most comprehensive national and sub-national results available on energy consumption in homes. RECS is the only national and subnational data series that allows policy makers and program implementers in both public and private organizations to analyze trends in energy consumption for the residential sector. RECS fulfills planning, analyses, and decision-making needs of DOE, other Federal agencies, state governments, utilities, researchers, and energy analysts in the private sector.

(4a) *Changes to Information Collection:* EIA will use online questions via internet and mail hardcopy questionnaires as the two modes of collection for Form EIA 457–A *Household Survey*. This dual collection mode represents a change from prior collection cycles of RECS where computer assisted personal interviewing (CAPI) was the primary method for collecting household energy characteristics data. EIA piloted three tests using internet and mail questionnaires to determine the feasibility of using these alternative data collection methods. Based on extensive analysis of sample representativeness, nonresponse bias, and data quality, EIA determined that collecting this information via internet and by mail were viable modes for 2020 and future RECS data collections.
