DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG-2019-0911]

Drawbridge Operation Regulation; Mobile River, Hurricane, AL

AGENCY: Coast Guard, DHS.

ACTION: Notice of temporary deviation from regulations; request for comments.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the CSX Transportation Railroad vertical lift bridge across Mobile River, mile 13.3 near Hurricane, Alabama. This deviation is needed to collect and analyze information on vessel traffic when the bridge tender is moved to a geographically remote centralized control point located in Mobile, AL. The Coast Guard is seeking comments from the public about the impact to vessel traffic generated by this change.

DATES: This deviation is effective from 6 a.m. January 27, 2020 through 6 p.m. March 27, 2020.

Comments and related material must be received by the Coast Guard on or before March 27, 2020.

ADDRESSES: You may submit comments identified by docket number USCG-2019-0911 using Federal eRulemaking Portal at <http://www.regulations.gov>.

See the “Public Participation and Request for Comments” portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions about this test deviation, call or email Mr. Doug Blakemore, Eighth Coast Guard District Bridge Administrator; telephone (504) 671-2128, email Douglas.A.Blakemore@uscg.mil.

SUPPLEMENTARY INFORMATION:

I. Background, Purpose and Legal Basis

CSX Railroad has established a central location to operate CSX drawbridges. They have requested to relocate the Mobile River bridge tender to their centralized location in Mobile, AL. This CSX vertical lift bridge is located at Mobile River, mile 13.3, Mobile County, near Hurricane, AL. It has a vertical clearance of 5.5' in the closed to vessel position. The bridge operates according

to 33 CFR 117.5. Mobile River is used primarily by commercial tow and recreational vessels. The bridge opens for vessels about 6 times per day and vessels that do not need the bridge to open may pass.

This deviation will last for 60 days. CSX will collect data on all bridge openings to ensure that the remote operations will not impact navigation. CSX will immediately return the tender to the bridge location if there are any system failures or weather conditions that will not allow the bridge tender to operate the bridge from Mobile.

The Coast Guard will publish information about this temporary deviation in our Local and Broadcast Notice to Mariners so that mariners are informed of this operating change and our request for comments on the change.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

II. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking, and will consider all comments and material received during the comment period. Your comment can help shape the

outcome of this deviation from drawbridge regulations. If you submit a comment, please include the docket number for this document, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal eRulemaking Portal at <http://www.regulations.gov>. If your material cannot be submitted using <http://www.regulations.gov>, contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

We accept anonymous comments. All comments received will be posted without change to <http://www.regulations.gov> and will include any personal information you have provided. For more about privacy and the docket, visit <http://www.regulations.gov/privacynotice>.

Documents mentioned in this deviation from drawbridge regulations as being available in this docket and all public comments, will be in our online docket at <http://www.regulations.gov> and can be viewed by following that website's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted or another document is published.

Dated: January 8, 2020.

Douglas Allen Blakemore, Sr.,
Bridge Administrator, Eighth Coast Guard District.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 200113-0013]

RIN 0648-BI32

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Snapper-Grouper Fishery of the South Atlantic Region; Regulatory Amendment 27

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS implements management measures described in Vision Blueprint Commercial Regulatory Amendment 27 (Regulatory

Amendment 27) to the Fishery Management Plan (FMP) for the Snapper-Grouper Fishery of the South Atlantic Region (Snapper-Grouper FMP), as prepared and submitted by the South Atlantic Fishery Management Council (Council). This final rule modifies commercial fishing seasons, trip limits, and minimum size limits for selected snapper-grouper species in the South Atlantic exclusive economic zone (EEZ). The purpose of this final rule is to improve equitable access for commercial fishermen in the snapper-grouper fishery, minimize discards to the extent practicable, and improve marketability within the snapper-grouper fishery.

DATES: This final rule is effective on February 26, 2020.

ADDRESSES: Electronic copies of Regulatory Amendment 27 may be obtained from www.regulations.gov or the NOAA Fisheries website at <https://www.fisheries.noaa.gov/action/regulatory-amendment-27-vision-blueprint-commercial-measures>. Regulatory Amendment 27 includes an environmental assessment, regulatory impact review, and a Regulatory Flexibility Act (RFA) analysis.

FOR FURTHER INFORMATION CONTACT: Mary Vara, NMFS Southeast Regional Office, telephone: 727-824-5305, or email: mary.vara@noaa.gov.

SUPPLEMENTARY INFORMATION: The snapper-grouper fishery in the South Atlantic region is managed under the Snapper-Grouper FMP and includes blueline tilefish, snowy grouper, greater amberjack, red porgy, vermilion snapper, almaco jack, other jacks complex (lesser amberjack, almaco jack, and banded rudderfish), queen snapper, silk snapper, blackfin snapper, and gray triggerfish, along with other snapper-grouper species. The Snapper-Grouper FMP was prepared by the Council and is implemented by NMFS through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

On October 17, 2019, NMFS published a proposed rule for Regulatory Amendment 27 in the **Federal Register** and requested public comment (84 FR 55531). Regulatory Amendment 27 and the proposed rule outline the rationale for the actions contained in this final rule. A summary of the management measures described in Regulatory Amendment 27 and implemented by this final rule is provided below.

Management Measures Contained in This Final Rule

This final rule modifies the commercial trip limits for blueline tilefish, greater amberjack, red porgy, and vermilion snapper; establishes commercial split seasons for snowy grouper, greater amberjack, and red porgy; and establishes a commercial trip limit for the other jacks complex. For the commercial sector, this final rule establishes a minimum size limit for almaco jack, removes the minimum size limits for silk snapper, queen snapper, and blackfin snapper, and reduces the minimum size limit for gray triggerfish in the EEZ off the east coast of Florida. The management measures in this final rule apply on board a vessel for which a Federal commercial permit for South Atlantic snapper-grouper has been issued. Unless otherwise noted, all weights in this final rule are described in gutted weight.

Commercial Trip Limit for Blueline Tilefish

This final rule modifies the commercial trip limit for blueline tilefish throughout the South Atlantic EEZ. During the period from January 1 through April 30 each year, the commercial trip limit is 100 lb (45 kg), and from May 1 through December 31 each year, the commercial trip limit is 300 lb (136 kg). The Council determined that a lower 100-lb (45-kg) commercial trip limit of blueline tilefish each year from January through April would help reduce snowy grouper discards by commercial fishermen operating south of Cape Hatteras, North Carolina, because the commercial trip limit for blueline tilefish would be met more quickly on a trip. This final rule maintains the current 300-lb (136-kg) trip limit for blueline tilefish from May through December when good weather conditions are more likely to allow commercial fishermen in the northern portion of the Council's area of jurisdiction to have greater access to the resource and optimize their harvest through an extended fishing season.

Commercial Split Season for Snowy Grouper

This final rule establishes two commercial fishing seasons for snowy grouper of January 1 through June 30 (Season 1) and July 1 through December 31 (Season 2) within the current fishing year. This final rule allocates the commercial quotas as 70 percent to Season 1, 107,754 lb (48,876 kg), and 30 percent to Season 2, 46,181 lb (20,947 kg). Any remaining commercial quota from Season 1 will be transferred to
