Abstract: EPA's Pollution Prevention (P2) Program is a voluntary program that encourages businesses/facilities to adopt P2 projects that reduces both financial costs (waste management and cleanup) and environmental costs (health problems and environmental damage). In passing the Pollution Prevention Act

(PPA) in 1990, Congress found that there are significant opportunities for industry to reduce or prevent pollution at the source through cost-effective changes in production, operation, and raw materials use. Such changes offer industry substantial savings in reduced raw material, pollution control, and liability costs as well as help protect the environment and reduce risks to worker health and safety. 42 U.S.C. 13101(a)(2). Furthermore, the PPA states the Administrator shall "establish an annual award program to recognize a company or companies which operate outstanding or innovative source reduction programs" (PPA section 6604) 42 U.S.C. 13103(b)(13). The EPA P2 Awards Program is an annual, voluntary, and non-monetary awards program that will recognize companies that demonstrate leadership in innovative P2 practices and encourage other entities to consider P2 approaches. This ICR may be applicable to HQ, as well as any of the 10 Regional Offices that choose to participate and implement a P2 Awards Program.
