

Pre-Qualification Announcement - Sale of East Hagit Gas-Powered Generation Site

- **Organization Name:** Israel Electric Corporation (IEC)
- **Organization Type:** National Government
- **Brief Organization Description:** Established in 1923 and 99.8% owned by the State of Israel, IEC is currently the sole vertically integrated electric utility company in Israel, operating in all segments: generation, transmission, distribution, supply and system operation. Most electricity generated in Israel is supplied by IEC. IEC is the second largest procurement organization in Israel, with \$1.56 billion worth of goods and services (excluding fuels) purchased in 2017 and 5,000 active suppliers worldwide.
- **Is there a Local Content Requirement?** No
- **Can Bids be Submitted in English:** Yes
- **Product/Service Being Sought:** On October 1, 2020 IEC published a Pre-Qualification announcement regarding the sale of "East Hagit" gas-powered generation site, with current installed capacity of 660MW. This is the 3rd out of 5 generation sites to be sold by IEC, including infrastructure and connected land, in the framework of the 2018 Israeli electricity reform which requires IEC to decrease its share in electricity generation. This opportunity is suitable for American IPP's with proven experience in ownership, operation and maintenance of power plants.
- **Purchase Needed By/Submission Deadline:** Pre-Qualification submissions - by 1/7/2021.
- **Types of Contacts:** IPP's that are interested in bidding, alone or in partnership with Israeli / international firms, to purchase and operate this power plant.
