

**DEPARTMENT OF LABOR****Employment and Training  
Administration****Investigations Regarding Eligibility To  
Apply for Worker Adjustment  
Assistance**

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Administrator of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether

the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing provided such request is filed in writing with the Administrator, Office of Trade Adjustment Assistance, at the address shown below, no later than June 15, 2020.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to

the Administrator, Office of Trade Adjustment Assistance, at the address shown below, not later than June 15, 2020.

The petitions filed in this case are available for inspection at the Office of the Administrator, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, Room N-5428, 200 Constitution Avenue NW, Washington, DC 20210.

Signed at Washington, DC, this 8th day of May 2020.

**Hope D. Kinglock,**

*Certifying Officer, Office of Trade Adjustment Assistance.*

the continuing effort to reduce  
paperwork and respondent (*i.e.*,  
employer) burden, conducts a  
preclearance consultation program to  
provide the public with an opportunity  
to comment on proposed and  
continuing information collection  
requirements in accordance with the  
Paperwork Reduction Act (PRA) (44  
U.S.C. 3506(c)(2)(A)). This program  
ensures that information is in the  
desired format, reporting burden (time  
and costs) is minimal, collection  
instruments are clearly understood, and  
OSHA's estimate of the information  
collection burden is accurate. The  
Occupational Safety and Health Act of  
1970 (the OSH Act) (29 U.S.C. 651 *et**seq.*) authorizes information collection  
by employers as necessary or  
appropriate for enforcement of the OSH  
Act or for developing information  
regarding the causes and prevention of  
occupational injuries, illnesses, and  
accidents (29 U.S.C. 657). The OSH Act  
also requires that OSHA obtain such  
information with minimum burden  
upon employers, especially those  
operating small businesses, and to  
reduce to the maximum extent feasible  
unnecessary duplication of efforts in  
obtaining information (29 U.S.C. 657).The Anhydrous Ammonia Storage  
and Handling Standard (29 CFR  
1910.111) specifies a number of  
paperwork requirements. The following  
is a brief description of the collection of  
information requirements contained in  
the standard.Paragraph (b)(3) of the Standard  
specifies that systems have nameplates  
if required, and that these nameplates  
“be permanently attached to the system  
(as specified by paragraph (b)(3)(i)) so as  
to be readily accessible for inspection  
. . . .” In addition, paragraph (b)(3)(ii)  
requires that markings on containers  
and systems covered by paragraphs (c)  
 (“Systems utilizing stationary, non-  
refrigerated storage containers”), (f)  
 (“Tank motor vehicles for the  
transportation of ammonia”), (g)  
 (“Systems mounted on farm vehicles  
other than for the application of  
ammonia”), and (h) (“Systems mounted  
on farm vehicles for the application of  
ammonia”) provide information  
regarding nine specific characteristics of  
the containers and systems. Similarly,  
paragraph (b)(4) of the Standard  
specifies that refrigerated containers be  
marked with a nameplate on the outer  
covering in an accessible place that  
provides information regarding eight  
specific characteristics of the container.The required markings ensure that  
employers use only properly designed  
and tested containers and systems to  
store anhydrous ammonia, thereby  
preventing accidental release of, and  
exposure of workers to, this highly toxic  
and corrosive substance.
