Before submitting the ICR revision to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection that is summarized in this document. The ICR and accompanying material are available in the docket for public review and comment.

SUPPLEMENTARY INFORMATION:

I. What information is EPA particularly interested in?

Pursuant to PRA section 3506(c)(2)(A) (44 U.S.C. 3506(c)(2)(A)), EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.
2. Evaluate the accuracy of the Agency’s estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.
3. Enhance the quality, utility, and clarity of the information to be collected.
4. Minimize the burden of the collection of information on those who

are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

II. What information collection activity or ICR does this action apply to?

Title: “TSCA Section 4 Test Rules, Consent Orders, Enforceable Consent Agreements, Voluntary Testing Agreements, Voluntary Data Submissions, and Exemptions from Testing Requirements (Reinstatement),” revised to now be “TSCA Section 4 Test Rules, Test Orders, Enforceable Consent Agreements (ECAs), Voluntary Data Submissions, and Exemptions from Testing Requirement.”

ICR number: EPA ICR No. 1139.12.

OMB control number: OMB Control No. 2070-0033.

ICR status: This ICR is currently scheduled to expire on October 31, 2021. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA’s regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Under TSCA section 4, EPA has the authority to promulgate rules, issue orders, and enter into consent agreements requiring manufacturers and processors to develop information on chemical substances and mixtures. The revisions to this ICR cover the information collection activities associated with the submission of information to EPA pursuant to TSCA section 4, as amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act. Under TSCA section 4, EPA has the authority to issue regulatory actions designed to gather or develop information related to human and environmental health, including hazard and exposure information, on chemical substances and mixtures. This information collection addresses the

burden associated with industry activities involved in the reporting and recordkeeping pursuant to TSCA section 4. The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Respondents/affected entities: Entities potentially affected by this ICR are manufacturers (including importers) or processors of chemical substances or mixtures, which are mostly chemical companies classified under NAICS Codes 325 and 324.

Estimated total number of potential respondents: 175.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 1.5.

Estimated total annual burden hours: 32,147 hours. Burden is defined in 5 CFR 1320.3(b).

Estimated total annual costs: \$7,650,663, includes no annualized capital investment or maintenance and operational costs.

III. Are there changes in the estimates from the last approval?

There is an overall increase of 29,020 hours in the total respondent burden that is currently approved by OMB for this ICR. This increase reflects changes in the number of actions, CBI substantiation requirements, and methodological updates. However, there is a reduction in annual cost estimates due to a change in the assumed battery of tests that may be required for this three-year period under potential testing actions. The assumption is based on statutory changes under the Lautenberg Act, such as the mandated tiered testing approach. Further details about these changes are included in this ICR supporting statement.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
