SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general and may be of interest to a wide range of stakeholders including environmental, human health, farm worker, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the Chemical Review Manager identified in the Table in Unit IV.

B. What should I consider as I prepare my comments for the EPA?

1. *Submitting CBI.* Do not submit this information to the EPA through *regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to the EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the

public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at <http://www.epa.gov/dockets/comments.html>.

II. Background

Registration review is the EPA’s periodic review of pesticide registrations to ensure that each pesticide continues to satisfy the statutory standard for registration, that is, the pesticide can perform its intended function without unreasonable adverse effects on human health or the environment. Registration review dockets contain information that will assist the public in understanding the types of information and issues that the agency may consider during the course of registration reviews. As part of the registration review process, the Agency has completed preliminary workplans for all pesticides listed in the Table in Unit IV. Through this program, the EPA is ensuring that each pesticide’s registration is based on current scientific and other knowledge, including its effects on human health and the environment.

III. Authority

The EPA is conducting its registration review of the chemicals listed in the

Table in Unit IV pursuant to section 3(g) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Procedural Regulations for Registration Review at 40 CFR part 155, subpart C. Section 3(g) of FIFRA provides, among other things, that the registrations of pesticides are to be reviewed every 15 years. Under FIFRA, a pesticide product may be registered or remain registered only if it meets the statutory standard for registration given in FIFRA section 3(c)(5) (7 U.S.C. 136a(c)(5)). When used in accordance with widespread and commonly recognized practice, the pesticide product must perform its intended function without unreasonable adverse effects on the environment; that is, without any unreasonable risk to man or the environment, or a human dietary risk from residues that result from the use of a pesticide in or on food.

IV. Registration Reviews

A. What action is the Agency taking?

A pesticide’s registration review begins when the agency establishes a docket for the pesticide’s registration review case and opens the docket for public review and comment. Pursuant to 40 CFR 155.50, this notice announces the availability of the EPA’s preliminary work plans for the pesticides shown in the following table and opens a 60-day public comment period on the work plans.

Registration review case name and No.	Docket ID No.	Chemical Review Manager and contact information
Chlorantraniliprole, Case Number 7448	EPA-HQ-OPP-2020-0034	Andrew Muench, muench.andrew@epa.gov , (703) 347-8263.
Sodium hydroxide, Case Number 4065	EPA-HQ-OPP-2020-0152	SanYvette Williams, williams.sanyvette@epa.gov , (703) 305-7702.

B. Docket Content

The registration review docket contains information that the agency may consider in the course of the registration review. The agency may include information from its files including, but not limited to, the following information:

- An overview of the registration review case status.
- A list of current product registrations and registrants.
- **Federal Register** notices regarding any pending registration actions.
- **Federal Register** notices regarding current or pending tolerances.
- Risk assessments.
- Bibliographies concerning current registrations.
- Summaries of incident data.
- Any other pertinent data or information.

Each docket contains a document summarizing what the agency currently knows about the pesticide case and a preliminary work plan for anticipated data and assessment needs. Additional documents provide more detailed information. During this public comment period, the agency is asking that interested persons identify any additional information they believe the agency should consider during the registration reviews of these pesticides. The agency identifies in each docket the areas where public comment is specifically requested, though comment in any area is welcome.

The registration review final rule at 40 CFR 155.50(b) provides for a minimum 60-day public comment period on all preliminary registration review work plans. This comment period is intended to provide an opportunity for public

input and a mechanism for initiating any necessary changes to a pesticide’s workplan. All comments should be submitted using the methods in **ADDRESSES** and must be received by the EPA on or before the closing date. These comments will become part of the docket for the pesticides included in the Table in Unit IV. Comments received after the close of the comment period will be marked “late.” The EPA is not required to consider these late comments.

The agency will carefully consider all comments received by the closing date and may provide a “Response to Comments Memorandum” in the docket. The final registration review work plan will explain the effect that any comments had on the final work plan and provide the agency’s response to significant comments.

Background on the registration review program is provided at: <http://www.epa.gov/pesticide-reevaluation>.

SUPPLEMENTARY INFORMATION: The Age Discrimination in Employment Act (ADEA) allows for individuals to waive rights and claims protected under the Act, provided certain circumstances are met; particularly that the waiver is knowing and voluntary. In order for an individual’s waiver in connection with a program to be considered knowing and voluntary, the employer must inform the individual in writing in a manner calculated to be understood by the average individual eligible to participate, as to (i) any class, unit, or group of individuals covered by such program, any eligibility factors for such program, and any time limits applicable to such program; and (ii) the job titles and ages of all individuals eligible or selected for the program, and the ages of all individuals in the same job classification or organizational unit who are not eligible or selected for the program. The EEOC’s regulations clarify that the relevant section of the ADEA addresses two principal issues: To whom information must be provided, and what information must be disclosed to such individuals. The purpose of the informational requirements is to provide an employee with enough information

regarding the program to allow an employee to make an informed choice whether or not to sign a waiver agreement. The employer does not provide this information to the EEOC; the ADEA and the EEOC’s regulation solely require that the employer provide this information to any employee it would apply to, and not to the Federal government.

The EEOC, in accordance with the PRA and OMB regulation 5 CFR 1320.8(d)(1), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the EEOC to assess the impact of its information collection requirements and minimize the public’s reporting burden. It also helps the public to understand the EEOC’s information collection requirements and provide the requested data in the desired format. The EEOC is soliciting comments on the information collection that is described below. The EEOC is especially interested in public comment that will assist the EEOC in the following: (1) Evaluating whether the collection of information is necessary for the proper performance of the Commission’s functions, including whether the collection has practical utility; (2) Evaluating the accuracy of the Commission’s estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) Enhancing the quality, utility, and clarity of the information to be collected; and (4) Minimizing the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses. Please note that written comments received in response to this notice will be considered public records.
