Abstract: Pursuant to section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA, 42 U.S.C. 11001 *et seq.*), certain facilities that manufacture, process, or otherwise use specified toxic chemicals in amounts above reporting threshold levels as provided in 40 CFR 372.25 must submit annually to EPA and to their designated state or Indian country officials toxic chemical release forms containing information specified by EPA; see 42 U.S.C. 11023. In addition, pursuant to section 6607 of the Pollution Prevention Act (PPA, 42 U.S.C. 13101 *et seq.*), facilities reporting under section 313 of EPCRA must also report pollution prevention and waste management data, including recycling information, for such chemicals; see 42 U.S.C. 13106. EPA compiles and stores these reports in a publicly accessible database known as the Toxics Release Inventory (TRI). Regulations at 40 CFR part 372, subpart B, require facilities that meet the above criteria to report annually.

This ICR consolidates the ICR for TRI Reporting currently approved by OMB under OMB Control No. 2025–0009, with the currently approved version of this ICR covering the TRI Reporting of additional chemicals. Upon OMB approval of this ICR, EPA intends to discontinue OMB Control No. 2025–0009.

Form Numbers: EPA Form 9350–1, EPA Form 9350–2, and EPA Form 9350–3.

Respondents/Affected Entities: Regulations at 40 CFR part 372, subpart

B, require facilities that meet all the following criteria to report:

1. The facility has 10 or more full-time employee equivalents (*i.e.*, a total of 20,000 hours worked per year or greater; see 40 CFR 372.3); and

2. The facility is included in a North American Industry Classification System (NAICS) Code listed at 40 CFR 372.23 or under Executive Order 13148, Federal facilities regardless of their industry classification; and

3. The facility manufactures (defined to include importing), processes, or otherwise uses any EPCRA section 313 (TRI) chemical in quantities greater than the established thresholds for the specific chemical in the course of a calendar year.

Respondent's obligation to respond: Mandatory (40 CFR 372).

Estimated number respondents: 76,534.

Frequency of response: Annual.

Total estimated burden: 3,615,128 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$200,205,764 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase of 3,597,275 hours. This ICR submittal merges the existing ICR (2025–0009, approved by OMB on October 15, 2018) into this ICR number (2070–0212), created to cover the expanded list of toxic chemicals subject to reporting under the NDAA for Fiscal Year 2020, to provide for a single control number. The burden levels already approved under the collections being consolidated in this ICR remain unchanged.

Abstract: The Clean Water State Revolving Funds (CWSRF) were established by the 1987 amendments to the Clean Water Act (CWA) as a financial assistance program for a wide range of wastewater infrastructure and other water quality projects. The 1987 amendments added Title VI to the CWA, enabling EPA to provide grants to all 50 states and Puerto Rico to capitalize CWSRFs. The CWSRFs can provide loans and other forms of assistance for a wide array of projects, including construction of wastewater treatment facilities, green infrastructure projects, agricultural best management practices, and water and energy efficiency improvements. In 2014, Title VI of the CWA was amended by the Water Resources Reform and Development Act (WRRDA). Additional information about the CWSRFs is available at <http://www.epa.gov/cwsrf/learn-about-clean-water-state-revolving-fund-cwsrf>.

Capitalization Grant Agreement/Intended Use Plan—The Capitalization Grant Agreement is the principal instrument by which a CWSRF commits to manage its revolving fund program in conformity with the requirements of the Clean Water Act. The grant agreement contains or incorporates by reference the intended use plan, application materials and CWSRF administrative budget, required certifications, and other documentation required by EPA. The intended use plan describes how a CWSRF program intends to use its funds for the upcoming year to meet the CWA objectives.

Annual Report—The annual report indicates how the CWSRF has met its goals and objectives of the previous state fiscal year as stated in the grant agreement and, more specifically, in the intended use plan. The report provides information on loan recipients, loan amounts, loan terms, project categories of eligible costs, and similar data on other forms of assistance.

Annual Audit—The CWA requires a CWSRF to undergo an annual audit. Though an audit conducted under the Single Audit Act meets this requirement, EPA still recommends that a CWSRF also undergo a separate independent audit as a best management practice. The audit must contain an opinion on the financial condition of the CWSRF program, a report on its internal controls, and a report on compliance with applicable laws and the CWA.

Clean Water National Information Management System (CWNIMS) and CWSRF Benefits Reporting (CBR)—States must enter financial data, including project disbursements, into the CWNIMS database on an annual basis. This publicly available information is used by EPA to assess compliance with the CWSRFs' mandate to use all funds in an "expeditious and timely" manner and achieve the objectives of the CWA.

Public Awareness Policy—Per EPA Grants Policy Issuance (GPI) 14-02: Enhancing Public Awareness of EPA Assistance Agreements, CWSRF borrowers must publicize EPA's involvement in project funding only up to the funding amount in each year's capitalization grant.

Form Numbers: None.

Respondents/affected entities: State environmental departments, and/or finance agencies responsible for operating the CWSRFs and eligible CWSRF borrowers.

Respondent's obligation to respond: Required to obtain or retain a benefit per Title VI of CWA as amended by WRRDA.

Estimated number of respondents: 51 state environmental departments and/or finance agencies (per year); 320 eligible CWSRF borrowers (per year).

Frequency of response: Varies by requirement (*i.e.*, quarterly, semi-annually and annually).

Total estimated burden: 57,230 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$6,013,420 (per year), includes \$2,928,100 annualized capital or operation & maintenance costs.

Changes in Estimates: There is a decrease of 530,156 hours (per year) in the total estimated respondent burden compared with the ICR currently approved by OMB. This large reduction is in response to additional OMB guidance recommending that the burden associated with the CWSRF applications be removed as part of this ICR renewal since (1): States have a significant degree of discretion in what information they solicit through the CWSRF applications and (2): CWSRF applications are not subject to EPA approval.
