

FEDERAL COMMUNICATIONS COMMISSION**[OMB 3060–XXXX; FRS 16725]****Information Collection Being Reviewed by the Federal Communications Commission****AGENCY:** Federal Communications Commission.**ACTION:** Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before July 7, 2020. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email PRA@fcc.gov and to Nicole.ongele@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418–2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–XXXX.

Title: Improving Outage Reporting for Submarine Cables and Enhanced Submarine Outage Data.

Form Number: Not applicable.

Type of Review: New information collection.

Respondents: Business or other for-profit.

Number of Respondents and

Responses: 75 respondents; 336 responses.

Estimated Time per Response: 6 hours.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Mandatory. Statutory authority for this information collection is contained in 47 U.S.C. 151, 154(i)–(j) & (o), 405, and the Cable Landing License Act of 1921, 47 U.S.C. 34–39, and 3 U.S.C. 301, and Exec. Order No. 10530.

Total Annual Burden: 2,016 hours.

Total Annual Cost: No cost.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: Outage reports filed with the Commission pursuant to Part 4 are presumed confidential. The information in those filings may be shared with the Department of Homeland Security only under appropriate confidential disclosure protections. Other persons seeking disclosure must follow the procedures delineated in 47 CFR 0.457 and 0.459 for requests for and disclosure of information. The information collection discussed here does not affect the confidential treatment of information submitted to the Commission's Network Outage Reporting System (NORS), an internet portal that collects submitted outage filings.

Needs and Uses: Section 151 of the Communications Act of 1934 (Act), as amended, requires the Commission to promote the safety of life and property through the use of wire and radio communications. Additionally, the Cable Landing License Act, (47 U.S.C. 34–39), and Executive Order 10530, provide the Commission with authority to grant, withhold, condition and revoke submarine cable landing licenses. Further, the Cable Landing License Act and Executive Order 10530 provide that the Commission may place conditions on the grant of a submarine cable landing license in order to assure just and reasonable rates and service in the operation and use of cables so licensed. "Just and reasonable service" entails assurance that the cable infrastructure will be reasonably available. Availability of submarine cables is also critically important for national security and the economy because submarine

cables carry approximately 95 percent of international communications traffic and are the primary means of connectivity for numerous U.S. states and territories. Currently, submarine cable licensees provide information to the Commission on a voluntary, ad hoc basis through the Undersea Cable Information System (UCIS).

This is a new collection that will be part of the Commission's NORS outage reporting regime. As with the other information collection collected in NORS (under OMB Control No. 3060–0484), this new collection will facilitate FCC monitoring, analysis, and investigation of the reliability and security of submarine cable networks, and to identify and action on potential threats to our Nation's telecommunications infrastructure. Drawing from a decade of experience in outage reporting, the Commission will seek an ongoing dialogue with submarine cable licensees, as well as with the industry at large, regarding lessons learned from the new information collection. These efforts will help the Commission develop a better understanding of the root causes of significant outages, and to explore preventive measures to mitigate the impact of such outages on the Nation and the American public.

The addition of mandatory submarine cable outage data will provide the Commission with greater visibility into the availability and health of these networks, allowing the Commission to better track and analyze submarine cable resiliency. This enhanced visibility into submarine cable network outages will allow the Commission to take appropriate actions to mitigate disruptions, if necessary, and to avoid the development of larger, more significant problems which could impact national security and public safety interests. Submarine cable outages do not typically occur with the same frequency as terrestrial outages, but when they do occur have a greater impact on the Nation's telecommunications due to the volume and nature of communications carried over such cables. Damages to submarine cables are usually caused by weather or inadvertent slicing by underseas equipment. However, submarine cables are also susceptible to intentional damage for nefarious purposes that could lead to a severe degradation of crucial government, as well as non-government, communications.

SUPPLEMENTARY INFORMATION: The Administration for Children and Families (ACF), a division of the U.S. Department of Health and Human Services (HHS), promotes the economic and social well-being of families, children, individuals and communities with funding, strategic partnerships, guidance, training, and technical assistance. ACF's programs serve a wide variety of groups, including individuals and families with low income, refugees, Native Americans, and many others. To carry out its activities, ACF awards grants to state and local governments, non-profit groups, faith and community-based organizations, federally recognized Indian tribes, and in some programs, state-recognized or other Native American communities. ACF furnishes technical assistance, guidance, and overall supervision to grantees that, in turn, are responsible for direct delivery of services.

Pursuant to Executive Order 13175 of November 6, 2000 and the ACF Tribal Consultation Policy signed in 2011, ACF will host an annual tribal consultation in recognition of the government-to-government relationship between the United States and Indian tribes. Tribes may comment on any program or service of ACF as part of the consultation.
