Notice of Public Comment Period on Technical Documents for External Peer Review and the Pool of Candidate Peer Reviewers for a Report on Physiologically Based Pharmacokinetic (PBPK) Modeling for Chloroprene and a Supplemental Analysis of Metabolite Clearance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public comment period and external peer review.

SUMMARY: The Environmental Protection Agency (EPA) is announcing a 30-day public comment period on documents

associated with a Report on Physiologically Based Pharmacokinetic (PBPK) Modeling for Chloroprene and a Supplemental Analysis of Metabolite Clearance. These documents will undergo independent external scientific peer review managed by Versar (<https://www.versar.com/>), an EPA contractor. Public comments on the documents associated with the PBPK modeling will be provided to the external peer reviewers. Versar will convene a virtual meeting of the peer reviewers, which will be open to the public and include an opportunity to provide oral comments. In preparation for the external peer review, EPA is also announcing a 30-day public comment period on the pool of candidates to conduct the external peer review of the documents identified above. Versar will consider public comments on these candidates and evaluate any conflicts of interest and/or appearance of lack of impartiality, and will then select nine independent experts from the pool of 19 candidates. Information on the external peer review process, including details on how to provide comments on the proposed pool of candidates, is further described in this notice. Once complete, the final peer review report will be used to inform EPA's Reconsideration of a 2017 Request for Correction related to the Integrated Risk Information System (IRIS) assessment of chloroprene.

DATES: The 30-day public comment period on the technical documents and the list of proposed peer review candidates begins July 24, 2020 and ends August 24, 2020. Comments must be received on or before August 24, 2020.

ADDRESSES: Submit written comments to Docket ID No. EPA-HQ-ORD-2020-0181 no later than August 24, 2020. Documents associated with this peer review will be available within the docket.

Submit comments on the pool of candidate peer reviewers to Versar no later than August 24, 2020 by one of the following methods: *chloroprenePBPK@versar.com* (Subject line: Chloroprene PBPK Peer Review); or by phone (301) 304-3121 (ask for Tracey Cowen). SUPPLEMENTARY INFORMATION:

I. Background

On June 26, 2017, the U.S. EPA received a Request for Correction (RFC) provided on behalf of Denka Performance Elastomer LLC (DPE). In the RFC letter, DPE claimed that the *Toxicological Review of Chloroprene (CAS NO. 126-99-8) in Support of Summary Information on the Integrated Risk Information System (IRIS)*, disseminated by EPA's Office of Research and Development (ORD) in 2010, did not reflect the "best available science" or "sound and objective scientific practices" and requested correction. On January 25, 2018, EPA concluded in response that the underlying information and conclusions presented in the IRIS chloroprene assessment are consistent with the EPA's Information Quality Guidelines and that no evidence published since the 2010 IRIS Assessment would change its conclusions. On July 23, 2018, DPE submitted a Request for Reconsideration of Denial of Request for Correction (RFR) with regard to EPA's decision, and entered into discussions with EPA to address the uncertainties identified by EPA as documented in the RFC response. Additional information regarding the chloroprene RFC/RFR can be found at: <https://www.epa.gov/quality/epa-information-quality-guidelines-requests-correction-and-requests-reconsideration#17002>. Discussions with Denka LLC (DPE) and its contractor, Ramboll, are summarized on the IRIS website (<https://cfpub.epa.gov/ncea/iris2/events.cfm#stakeholderMeetings>).

An updated PBPK model is now available in a report: "Physiologically Based Pharmacokinetic (PBPK) Modeling for Chloroprene (Ramboll, 2020)". This report, and a Supplemental Analysis of Metabolite Clearance (U.S. EPA, 2020), will undergo external peer review to help to inform future decisions regarding the RFR.

II. Information About this Peer Review

Versar is considering a list of candidates from which to select the independent, external, peer review panel. The List of Candidates (LoC) document has been posted to the docket at <https://www.regulations.gov> (Docket ID No. EPA-HQ-ORD-2020-0181) and

is included below. After review and consideration of public comments, Versar will select from this pool the final list of nine (9) peer reviewers in a manner consistent with EPA's Peer Review Handbook 4th Edition, 2015 (EPA/100/B-15/001). Versar will independently conduct a conflict of interest (COI) screening of candidates to ensure that the selected experts have no COI. EPA will announce the peer review panel meeting date, location, and registration details, along with the final list of peer reviewers selected by Versar, at least 30 days prior to the peer review meeting, on the EPA IRIS website (<https://www.epa.gov/iris>). Teleconference and webinar information regarding this public meeting will be provided through the IRIS website (<https://www.epa.gov/iris>) and via EPA's IRIS listserv. To register for the IRIS listserv, visit IRIS website at <https://www.epa.gov/iris/forms/staying-connected-integrated-risk-information-system#connect>. Specific questions or comments on the peer review process should be directed to Versar by email: *chloroprenePBPK@versar.com* (Subject line: Chloroprene PBPK Peer Review); or by phone (301) 304-3121 (ask for Tracey Cowen). Comments or questions regarding the peer review candidates must be provided to Versar by August 24, 2020.

SUPPLEMENTARY INFORMATION:

I. Information About IRIS Assessment Plans

EPA's IRIS Program is a human health assessment program that evaluates quantitative and qualitative information on the health effects that may result from exposure to chemicals found in the environment. Through the IRIS Program, EPA provides high quality science-based human health assessments to support the Agency's regulatory activities and decisions to protect public health. As part of scoping and initial problem formulation activities prior to the development of an assessment, the IRIS Program carries out a broad, preliminary literature survey to assist in identifying health effects that have been studied in relation to the chemical or substance of interest, as well as science issues that may need to be considered when evaluating toxicity. This information, in conjunction with scoping needs identified by EPA
