Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission’s burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. Title: Section 90.176, Coordination Notification Requirements on Frequencies Below 512 MHz or at 764–776/794–806 MHz.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents and Responses: 17 respondents; 4,420 responses.

Estimated Time per Response: 0.5 hours.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection (IC) is contained in sections 47 U.S.C. 154(i), 161, 303(g), 303(r) and 332(c)(7) of the Communications Act of 1934, as amended.

Total Annual Burden: 2,210 hours.

Total Annual Cost: No cost.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality.

Needs and Uses: This collection will be submitted as an extension after this 60 day comment period to Office of Management and Budget (OMB) in order to obtain the full three-year clearance.

Section 90.176 requires each Private Land Mobile frequency coordinator to provide, within one business day, a listing of their frequency recommendations to all other frequency coordinators in their respective pool, and if requested, an engineering analysis.

Any method can be used to ensure this compliance with the “one business day requirement” and must provide, at a minimum, the name of the applicant; frequency or frequencies recommended; antenna locations and heights; and effective radiated power; the type(s) of emissions; the description of the service area; and the date and time of the recommendation. If a conflict in recommendations arises, the effected coordinators are jointly responsible for taking action to resolve the conflict, up to and including notifying the Commission that an application may have to be returned.

This requirement seeks to avoid situations where harmful interference is created because two or more coordinators recommend the same frequency in the same area at approximately the same time to different applicants.
