SUPPLEMENTARY INFORMATION:

Background: Pursuant to its Procedure for “Public Participation in Formulation of Marketing Policy” published in the **Federal Register** on July 6, 1978, 43 FR 29186, Southeastern published a “Notice of Issuance of Final Power Marketing Policy, Kerr-Philpott System of Projects” in the **Federal Register** on July 29, 1985, 50 FR 30751. The policy establishes the marketing area for system power and addresses the utilization of area utility systems for essential purposes. The policy also addresses wholesale rates, resale rates, and conservation measures, but does not address renewable energy certificates. Under Section 5 of the Flood Control Act of 1944 (16 U.S.C. 825s), Southeastern is responsible for the transmission and disposition of electric power and energy from reservoir projects operated by the Department of the Army. Furthermore, Southeastern must transmit and dispose of such power and energy in such manner as to encourage the most widespread use at the lowest possible rates to consumers consistent with sound business principles. Rate schedules shall be drawn to recover all costs associated with producing and transmitting the power in accordance with repayment criteria.

All documents introduced at the public information and comment forum, and all comments, questions and answers will be available for inspection and copying in accordance with the Freedom of Information Act (5 U.S.C. 552).
