[Project No. 15011–000]

Renewable Energy Aggregators, Inc.; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On October 11, 2019, Renewable Energy Aggregators, Inc. filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Delaney Pumped Storage Project (Delaney Project or project) to be located near the town of Tonopah, Maricopa County, Arizona. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) A newly constructed upper reservoir with an earthen/roller-compacted concrete dam and a surface area of 150 acres with a storage capacity of 11,525 acre-feet of water; (2) a newly constructed lower reservoir of 2,000 acres with a storage capacity of approximately 15,250 acre-feet; (3) two 22,000-foot-long, 19-foot-diameter penstocks; (4) a powerhouse with dimensions of 750 feet long by 175 feet high by 70 feet wide containing as many as two ternary style pump/generating units; (5) two 3,000-foot-long, 21-foot-diameter tailrace tunnels; and (6) a connection to the existing Delaney Substation within the project boundary. The estimated annual generation of the Delaney Project would be 864,000 megawatt-hours.
