

7172(f)). Such exports require authorization under section 202(e) of the Federal Power Act (16 U.S.C. 824a(e)).

On May 21, 2020, DMG filed an application with DOE (Application or App.) to transmit electric energy from the United States to Canada for a term of five years. DMG states that it “is a British Columbia corporation with its office and principal place of business in Vancouver, British Columbia, Canada” and that it “has a US subsidiary in Sunnyvale, California.” App. at 1. DMG adds that it “does not own, operate or control any electric generation assets, not is it affiliates with any entity that owns generation assets in the United States,” and that “[n]either DMG nor any of its affiliates holds a franchise or service territory for the transmission, distribution or sale of electric power.” *Id.* at 2.

DMG further states that it “will purchase power to be exported from electric utilities, federal power marketing agencies, qualifying cogeneration, small power production facilities and exempt wholesale generators as those terms defined in the FPA.” App. at 3. DMG contends that its proposed exports will not impair the sufficiency of electric supply within the United States and will neither impede nor tend to impede the operational reliability of the bulk power system. *See id.*

The existing international transmission facilities to be utilized by the Applicant have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.
