#### Background

As requested by the USTR, the Commission will conduct an investigation and prepare a report that provides, to the extent practical, the following information:

(1) An overview of the U.S. raspberry industry in Washington State—including fresh raspberries for processing, frozen raspberries, and raspberry juice—as well as an overview of the industries producing fresh and processed raspberries in major producing and exporting countries. The overviews should include information on production and processing volumes and trends, planted acreage, processing capacity, supply chains, domestic consumption, and imports and exports of fresh and processed raspberries.

(2) Production, pricing, and consumption trends for fresh and processed raspberries in the United States and other major producing and exporting countries over the last five years. Pricing analysis should include the relationship between prices of domestic products and imports of fresh and processed raspberries in the U.S. market to the extent such data is available.

(3) An overview of U.S. imports of fresh and processed raspberries including information on the main country sources of supply, trade patterns, and supply chains of major suppliers to the United States, as well as an overview of country of origin labeling practices in major U.S. supplier countries.

(4) A description of foreign government policies, financial aid, and programs that directly or indirectly affect production, infrastructure, exports, and imports of fresh and processed raspberries, including

product labeling and food safety regulations, producer support, and tariff and nontariff measures.

(5) A comparison of the competitive strengths and weaknesses of production and exports of fresh and processed raspberries in the United States and other major producing and exporting countries, including such factors as costs of production, industry structure, technology, product innovation, exchange rates, supply chains and distribution, pricing, marketing regimes, and government policies.

(6) A qualitative and, to the extent possible, quantitative assessment of the economic impact of imports from major producing and exporting countries on production and prices of U.S. fresh and processed raspberries.

The USTR requested that the report primarily focus on the 2015 to 2019 time period. The USTR requested that the Commission transmit its report no later than 14 months following receipt of this request. In his request letter, the USTR stated that his office intends to make the Commission's report available to the public in its entirety and asked that the Commission not include any confidential business information.
