

The Rule imposes no appreciable current capital or start-up costs. As stated above, warrantors likely have already modified their warranties to include the information the Rule requires. Rule compliance does not require the use of any capital goods, other than ordinary office equipment, which providers would already have available for general business use.

Request for Comment

Your comment—including your name and your state—will be placed on the public record of this proceeding at the <https://www.regulations.gov> website. Because your comment will be made public, you are solely responsible for making sure that your comment does not include any sensitive personal information, such as anyone's Social Security number; date of birth; driver's license number or other state identification number, or foreign country equivalent; passport number; financial account number; or credit or debit card number. You are also solely responsible for making sure that your comment does not include any sensitive health information, such as medical records or other individually identifiable health information. In addition, your comment should not include any "trade secret or any commercial or financial information which . . . is privileged or confidential" —as provided by Section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2)—including in particular competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

Background

The Administrator of GSA established the Committee on June 20, 2011 (*Federal Register*/Vol. 76, No. 118) pursuant to Section 494 of the Energy Independence and Security Act of 2007 (EISA, 42 U.S.C. 17123). Under this authority, the Committee provides independent policy advice and recommendations to GSA to advance federal building innovations in planning, design, and operations to reduce costs, enable agency missions, enhance human health and performance, and minimize environmental impacts.

The *Renewables Outleasing Task Group* will explore third-party, onsite, renewable power generation, with a focus on solar power and perhaps energy storage, on federal building roofs, parking lots, garages and other parcels where conducive.

The *Embodied Energy Task Group* will study the energy savings as well as pollution and cost savings to be garnered by a more precise focus on the energy embodied in Federal building construction and major renovation.

The conference calls will allow the task groups to develop consensus recommendations to the full Committee, which will, in turn, decide whether to proceed with formal advice to GSA based upon these recommendations.

June 11, 2020 Meeting Agenda

- Updates and introductions
- Renewables outleasing task group findings & recommendations
- Lunchtime speaker (TBD)
- Embodied energy task group findings & recommendations
- Additional topics proposed by Committee members
- Public comment
