BILLING CODE P

DEPARTMENT OF AGRICULTURE

Forest Service

Forest Service Manual 2750; Special Uses Management Manual; Leasing Forest Service Administrative Sites

AGENCY: Forest Service, USDA.

ACTION: Notice of availability for public comment.

SUMMARY: The United States Department of Agriculture (USDA), United States

Forest Service (Forest Service), is issuing proposed new directives on leasing Forest Service administrative sites.

DATES: Comments must be received in writing by July 6, 2020.

ADDRESSES: Proposed directives may be reviewed and electronic comments may be submitted electronically to <https://cara.ecosystem-management.org/Public/CommentInput?project=ORMS-2245>. Written comments may be mailed to Matthew Fountain, Program Analyst, Lands and Realty Management, 201 14th Street SW, Washington, DC 20024. All timely received comments, including names and addresses, will be placed in the record and will be available for public inspection and copying. The public may inspect comments received at <https://cara.ecosystem-management.org/Public/ReadingRoom?project=ORMS-2245>.

FOR FURTHER INFORMATION CONTACT: Matthew Fountain, Program Analyst, at 202-403-8959, by electronic mail to SM.FS.WO_LandStaff@usda.gov; or to the Federal eRulemaking portal at <http://www.regulations.gov>. Individuals using telecommunication devices for the deaf may call the Federal Information Relay Service at 800-877-8339 between 8:00 a.m. and 8:00 p.m. Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: This proposed directive would set forth direction for leasing Forest Service administrative sites. Proposed direction would implement section 8623 of the Agriculture Improvement Act of 2018, Public Law 115-334, and leasing provisions of the Forest Service Facility Realignment and Enhancement Act of 2005. The leasing provisions of these Acts provide Forest Service the authority to lease Forest Service administrative sites and up to 10 isolated, undeveloped parcels of not more than 40 acres each, for consideration equivalent to their market value.

This manual is a new addition to the 2700 Special Uses Management series, and sets forth policy, responsibilities, and programmatic direction for leasing Forest Service administrative sites. The Forest Service has determined that this manual formulates a standard, criterion, or guideline applicable to a Forest Service program and is therefore publishing the proposed manual for public comment under 36 CFR part 216.

The Forest Service is seeking public comment on all content within the proposed manual. Comment is also invited on the sufficiency of the proposed manual in meeting its stated objectives, ways to enhance the utility

and clarity of information within the manual, or ways to streamline processes outlined in the text.

After the public comment period closes, the Forest Service will consider timely comments that are within the scope of the proposed directive in the development of the final directive. A notice of the final directive, including a response to timely comments, will be posted on the Forest Service's web page at <https://www.fs.fed.us/about-agency/regulations-policies/comment-on-directives>.

Tina Johna Terrell,

Associate Deputy Chief, National Forest System.

BILLING CODE 3411-15-P

DEPARTMENT OF AGRICULTURE

Forest Service

Bighorn National Forest; Wyoming; Invasive and Other Select Plant Management

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service, USDA, will prepare an environmental impact statement (EIS) to disclose the effects of continued control of noxious, invasive, and select native plant species through the integration of manual, mechanical, biological, ground herbicide, and aerial herbicide control methods on the Bighorn National Forest (BNF). Effects analysis of these treatments will be projected over the next 10 to 20 years. The BNF is currently treating noxious weeds and invasive plants under the June 19, 1998 Decision Notice, Noxious Weed Management. There is a need to update this decision since it did not include consideration of aerial application of herbicides, the presence of new invasive plant populations, or herbicide treatments of select native plant species to achieve desired resource conditions.

DATES: Comments concerning the scope of the analysis must be received by July 20, 2020. The draft EIS is expected November 2020 and the final EIS is expected June 2021.

ADDRESSES: Send written comments to Forest Supervisor, Bighorn National Forest, 2013 Eastside Second Street, Sheridan, Wyoming 82801. Comments may also be sent via email to comments-bighorn@usda.gov, or via facsimile to 307-674-2668.

FOR FURTHER INFORMATION CONTACT: Christopher D. Jones, Project

Coordinator, at the above address, by phone at 307-674-2627, or via email christopher.d.jones@usda.gov.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Purpose and Need for Action

BNF ecosystems are increasingly threatened by invasive plants. These plants include several invasive annual grasses including cheatgrass (*Bromus tectorum*), medusahead (*Taeniatherum caput-medusae*), and ventenata (*Ventenata dubia*). Invasive species are threatening or dominating desired native plant communities, big game winter ranges, sage-grouse habitat, soil and watershed resources, recreation, domestic livestock forage availability, and aesthetic values on the BNF. A shift from desired native vegetation to invasive plants alters wildlife habitat, decreases wildlife and livestock forage, reduces species diversity, increases soil erosion due to a decrease in surface cover, alters the fire return interval, and promotes undesirable monocultures.

In addition, there are select native plant species, such as sagebrush and larkspur, in need of management to meet desired conditions for wildlife and livestock forage. This analysis will consider the use of various treatments to achieve desired conditions for sagebrush including a mix of early-, mid-, and late-structural stages.

The purpose of this project is to prevent and reduce the loss of native plant communities associated with the spread of invasive plant species, to meet desired conditions for select native plant species, and to reduce the impacts from invasive plants on other resources. This purpose would be achieved by addressing the following needs:

- To meet existing law, regulation and agency policy directing the Forest Service to treat non-native and invasive plants and update existing management direction to include new invasive plant species and new treatments.
- To make cooperative treatment and control of invasive plant species more consistent and effective across land ownership boundaries.
- To help meet or maintain desired resource conditions on the BNF. This includes:
 - Limiting the spread of invasive plant species into areas with little or no infestation and reducing fuel loading and the resulting fire hazard and/or risk;
