Abstract: The primary objective of the National Agricultural Statistics Service (NASS) is to collect, prepare and issue State and national estimates of crop and livestock production, prices, and disposition; as well as economic statistics, environmental statistics related to agriculture and also to conduct the Census of Agriculture.

The Fruits, Nuts, and Specialty Crops survey program collects information on acreage, yield, production, price, and value of citrus and non-citrus fruits and nuts and other specialty crops in States with significant commercial production. The program provides data needed by the U.S. Department of Agriculture and other government agencies to administer programs and to set trade quotas and tariffs. Producers, processors, other industry representatives, State Departments of Agriculture, and universities also use forecasts and estimates provided by these surveys. All questionnaires included in this information collection will be voluntary.

The changes that were made to the fruit and nut commodity surveys at NASS following the program review process that occurs every five years following the Census of Agriculture can be found on the NASS website https://www.nass.usda.gov/Surveys/Program_Review/2019/Noncitrus-Fruit-and-Tree-Nut-Program.pdf.

The changes that were made to other programs can be found at https://www.nass.usda.gov/Surveys/Program_Review/index.php.

Authority: These data will be collected under authority of 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by Section 1770 of the Food Security Act of 1985 as amended, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents. This Notice is submitted in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–113) and Office of Management and Budget regulations at 5 CFR part 1320.

NASS also complies with OMB Implementation Guidance, “Implementation Guidance for Title V of the E-Government Act, Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA),”

Federal Register, Vol. 72, No. 115, June 15, 2007, p. 33362.

The frequency of data collection for the different surveys will include annual, seasonal, quarterly, monthly, and one weekly survey. Estimated number of responses per respondent is 1.1. Publicity materials and instruction sheets will account for approximately 5 minutes of additional burden per respondent. Respondents who refuse to complete a survey will be allotted 2 minutes of burden per attempt to collect the data.

Respondents: Producers, processors, and handlers.

Estimated Number of Respondents: 74,000.

Estimated Total Annual Burden on Respondents: 27,000 hours.

Comments: Comments are invited on:

(a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency’s estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, through the use of appropriate automated, electronic, mechanical, technological or other forms of information technology collection methods.

The applicable Section 232 and Section 301 decisions require subject merchandise to be admitted to FTZs in privileged foreign status (19 CFR 146.41).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary and sent to: ftz@trade.gov. The closing period for their receipt is August 10, 2020.
