

II. Background and Purpose

In the request for comments we published February 14, 2020 (85 FR 8601), we stated that in October of 2017, the Government Accountability Office issued report GAO-18-9, titled “Actions Needed to Close Stations Identified as Overlapping and Unnecessarily Duplicative.” This GAO report recommended the consolidation of eighteen boat stations. Due to environmental and operational factors, the Coast Guard is not considering all eighteen boat stations identified in the GAO report for consolidation. Instead, we anticipate consolidating five stations, with implementation notionally scheduled for fiscal year 2021. These stations have been identified because there are other units nearby capable of responding to cases in these areas, and because these five stations respond to a low number of cases. We do not anticipate any adverse effect on Coast Guard response capability. We expect an improvement to the proficiency of boat operators as well as a less complicated response system.

III. Discussion

In response to a request from an interested person the Coast Guard has reopened the comment period to allow additional input from the public. The new due date for comments is close May 4, 2020. The following information was provided in our February 14 request for comments.

Many stations were established at a time when boats lacked engines and were powered by oars and paddles. With modern boat operating speeds and improved direction finding technology, many calls for Coast Guard assistance can be responded to by multiple units significantly faster than when these boat stations were first established. The combination of significantly improved response times, along with an overall reduction in rescue calls due to boating safety improvements throughout the nation, has resulted in a number of boat stations becoming redundant. This consolidation will result in a more robust response system by increasing staffing levels and capacity at select nearby boat stations. Such a consolidation creates synergy and more opportunities for boat operators to properly train instead of missing training opportunities while standing ready to respond to calls that do not come. Station Oxford and Stations-Small Fishers Island, Shark River, Roosevelt Inlet, and Salem have been identified for consolidation with neighboring stations.

IV. Public Participation and Request for Comments

We encourage you to submit comments through the Federal portal at <https://www.regulations.gov>. If your material cannot be submitted using <https://www.regulations.gov>, contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions. In your submission, please include the docket number for this notice and provide a reason for each suggestion or recommendation.

We accept anonymous comments. All comments received will be posted without change to <https://www.regulations.gov> and will include any personal information you have provided. For more about privacy and submissions in response to this document, see DHS’s eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

Documents mentioned in this notice as being available in the docket, and all public comments, will be in our online docket at <https://www.regulations.gov> and can be viewed by following that website’s instructions.

Dated: April 14, 2020.

Matthew W. Sibley,

Rear Admiral, U.S. Coast Guard, Assistant Commandant for Capability.
