#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The collection is necessary under section 748.8(o) and Supplement 2 section (o) to Part 748 of the Export Administration Regulations (EAR). Licensing officers must make decisions on licensing the export of United States commodities and technical data to

foreign countries. When an export involves certain technical data or knowhow described in the Export Administration Regulation, additional information is required to fully understand the transaction and make a licensing decision. The Technology Letter of Explanation provides a written description of the technology proposed for export sufficient to allow BIS technical staff to evaluate the impact of licensing the export on United States national security and foreign policy. The letter of assurance puts the consignee on notice that the technology is subject to U.S. export controls and causes the consignee to certify that it will not release the data or the direct product of the data to certain specified country group nationals; thus providing assurance that U.S. national security data will be safeguarded and used only for the stated end use. The additional information is necessary to evaluate technology exports as covered under this collection.
