Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877-8339.

Copies of available documents submitted to OMB may be obtained from Ms. Guido.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: The National Family Self-Sufficiency (FSS) Demonstration.

OMB Approval Number: N/A.

Type of Request (i.e. new, revision or extension of currently approved collection): New collection.

Form Number: N/A.

Description of the need for the information and proposed use: In 2012, HUD commissioned the national Family Self-Sufficiency (FSS) Study. MDRC

was selected to lead this evaluation. As part of the longer-term follow-up, which HUD authorized in 2018—and extends through 2021, MDRC will conduct a long-term follow-up survey with a sample of individuals who enrolled in the study and were randomly assigned to a program group (offered the opportunity to enroll in FSS and receive services) or a control group. The survey will allow us to understand the FSS program's long-term effects on indicators of economic self-sufficiency (employment and income, for example) and well-being (health, financial, material, housing, for example). The survey will also provide an opportunity to understand the program participation experiences of FSS participants in the study who continue to be enrolled in FSS and those who exited for a variety of reasons, including graduation from FSS. No other comprehensive data source exists to provide the type of information that will be collected by this follow-up survey.

Respondents: Participants enrolled in the HUD Family Self-Sufficiency Evaluation.

Estimated Number of Respondents: The survey will be fielded to 1,300 sample members, one half coming from the program group and the other half from the control group. We expect between 60 to 70 percent of the respondents will complete the survey.

Estimated Time per Response: 15-minute survey interview.

Frequency of Response: 1 interview.

Estimated Total Annual Burden

Hours: 325 hours.¹

Estimated Total Annual Cost: \$3,276.

Respondent's Obligation: Voluntary.

Legal Authority: The survey is conducted under Title 12, United States Code, Section 1701z and Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C., 35, as amended.

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Cost
Total	1,300	1	1	0.25	325	² \$10.08	³ \$3,276

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of

information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the

proper performance of the functions of the agency, including whether the information will have practical utility;

¹ The estimated total annual burden hours estimate if all 1,300 study participants respond to the survey is 325. However, we expect that between 60 to 70 percent of the respondents will complete the survey. In that case, the actual total annual burden hours would be between 195 to 228 hours.

² To compute the hourly cost per response, MDRC used the average state minimum wage of the 18 study sites, as of July 1, 2020. In cases where the

site's county had a higher minimum wage than the site's state, the county minimum wage was used for the calculations. Across the 18 sites in 7 states (California, Florida, Maryland, Missouri, New Jersey, Ohio, and Texas), the minimum wages ranged from \$7.25 to \$15 per hour.

³ To compute the total estimated annual cost, the total estimated annual burden hours were multiplied by the hourly cost per response. The

calculation assumes 325 total annual burden hours if all 1,300 study participants respond to the survey. However, we expect that between 60 to 70 percent of the respondents will complete the survey. In that case, the actual total annual burden hours may be between 195 and 228 hours, and the actual total annual cost would be between \$1,965.60 and \$2,298.24.

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Data Collection and Reporting for HUD's Continuum of Care Program—Annual Performance Report and System Performance Report.

OMB Approval Number: Pending.

Type of Request: New.

Description of the need for the information and proposed use: This request is for clearance of data collection and reporting to enable the U.S. Department of Housing and Urban Development (HUD) Office of Community Planning and Development (CPD) to continue to manage and assess the effectiveness of its homeless assistance projects on an annual basis. Per 24 CFR 578.103(e), HUD requires recipients and subrecipients that receive funding through the CoC Program (authorized by the McKinney-Vento

Homeless Assistance Act, as amended by the Homeless Emergency Assistance and Rapid Transition to Housing (HEARTH) Act) to prepare and submit annual project-level reports on performance and spending.

This request will also enable the HUD CPD Office to initiate a process to assess the effectiveness of local coordinated systems of homeless assistance. The McKinney-Vento Homeless Assistance Act, as amended, now requires communities to measure their performance as a coordinated system, in addition to analyzing performance by specific projects or project types. Section 427 of the Act established a set of selection criteria for HUD to use in awarding CoC Program funding. These selection criteria require CoCs to report to HUD their system-level performance. The intent of these selection criteria are to encourage CoCs, in coordination with Emergency Solutions Grant (ESG) Program recipients and all other homeless assistance stakeholders in the community, to regularly measure their progress in meeting the needs of people experiencing homelessness in their community and to report this progress to HUD. This request is for HUD to collect system-level performance measure data from CoCs on an annual basis, as described in Appendix B of this document.

The project APR and system-level performance measures both rely on a primary data source in each CoC—a local Homeless Management Information System (HMIS). An HMIS is an electronic data collection system that stores person-level information about homeless persons who access a community's homeless service system. Over the past decade, HUD has supported the development of local HMIS by funding their development and implementation, by providing technical assistance, and by developing national data standards that enable the collection of standardized information on the characteristics, service patterns and service needs of homeless persons within a jurisdiction and across jurisdictions. These standards are described in HUD's HMIS Data Standards.
