SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the

National Agricultural Workers Survey (NAWS) information collection. The National Agricultural Workers Survey is an employment based annual survey of the demographic, employment, and health characteristics of hired crop workers, including those who employers hire indirectly through labor contractors. The survey began in 1988. Each year the NAWS contractor interviews between 1,500 and 3,500 crop workers. The contractor interviews crop workers three times per year to account for the seasonality of agricultural employment. ETA uses NAWS data to estimate each State's share of crop workers who are eligible for employment and training services through ETA's National Farmworker Jobs Program. Other Federal agencies similarly use the survey's data to estimate the number and characteristics of crop workers and their dependents who qualify to participate in or receive services from various migrant and seasonal farmworker programs. The United States Department of Agriculture routinely uses NAWS data, along with other data, to estimate changes in agricultural productivity. The Wagner-Peyser Act authorizes this information collection. See 29 U.S.C. 49f(d) and 49l–2(a).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB under the PRA approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1205–0453.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on November 30, 2019. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on July 25, 2019 (84 FR 35886).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty-(30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1205–0453. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Certificate of Electrical Training and Applications for MSHA Approved Tests and State Tests Administered as Part of an MSHA-approved State Program information collection. Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal and metal and nonmetal mines. Under section 305(g) of the Mine Act, all electric equipment shall be frequently examined, tested, and properly maintained by a qualified person to assure safe operating conditions.

Title 30 CFR 75.153 and 77.103 define a person as qualified to perform electrical work if he has been qualified as a coal mine electrician by a State that has a coal mine electrical qualification program approved by MSHA; or if he has at least one year of experience performing electrical work underground in a coal mine, in a surface coal mine, in a noncoal mine, in the mine equipment manufacturing industry, or in any other industry using or manufacturing similar equipment, and has satisfactorily completed a coal mine electrical training program approved by MSHA or has attained a satisfactory grade on a series of five written tests approved by MSHA. MSHA Form 5000–1 provides the coal mining industry with a standardized reporting format that expedites the certification process while ensuring compliance with the regulations. The information provided on the form enables MSHA to determine if the applicants satisfy the requirements to obtain the certification or qualification. The Department has received approval from OMB for this ICR under OMB Control No. 1219–0001.

OMB authorization for an ICR cannot be for more than three (3) years without renewal and the current approval for this collection will expire on November 30, 2019. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing
