

statement for the Pacific Islands Region Logbook Family of Forms (OMB Control No. 0648–0214) for reporting related to observer safety on longline vessels is estimated to average 5 minutes per reporting incident. These estimates include time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Notwithstanding any other provision of the law, no person is required to respond to, and no person shall be subject to penalty for failure to comply with, a collection-of-information subject to the requirements of the PRA, unless that collection-of-information displays a currently valid OMB control number.

Authority: 16 U.S.C. 1361 *et seq.* and 16 U.S.C. 951 *et seq.*

Dated: July 28, 2020.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 200227–0066; RTID 0648–XA383]

Fisheries of the Exclusive Economic Zone Off Alaska; Reallocation of Pacific Cod in the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; reallocation.

SUMMARY: NMFS is reallocating the projected unused amount of Pacific cod from vessels using jig gear and catcher vessels greater than or equal to 60 feet (18.3 meters (m)) length overall (LOA) using hook-and-line gear to catcher vessels less than 60 feet (18.3 m) length overall using hook-and-line or pot gear in the Bering Sea and Aleutian Islands (BSAI) management area. This action is necessary to allow the 2020 total allowable catch (TAC) of Pacific cod to be harvested.

DATES: Effective August 14, 2020, through 2400 hours, Alaska local time (A.l.t.), December 31, 2020.

FOR FURTHER INFORMATION CONTACT: Krista Milani, 907–581–2062.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2020 Pacific cod TAC specified for vessels using jig gear in the BSAI is 1,278 metric tons (mt) as established by the final 2020 and 2021 harvest specifications for groundfish in the BSAI (85 FR 13553, March 9, 2020) and reallocation (85 FR 4601, January 27, 2020).

The 2020 Pacific cod TAC specified for catcher vessels greater than or equal to 60 feet (18.3 m) LOA using hook-and-line gear in the BSAI is 277 mt as established by the final 2020 and 2021 harvest specifications for groundfish in the BSAI (85 FR 13553, March 9, 2020).

The 2020 Pacific cod TAC allocated to catcher vessels less than 60 feet (18.3 m) LOA using hook-and-line or pot gear in the BSAI is 3,433 mt as established by final 2020 and 2021 harvest specifications for groundfish in the BSAI (85 FR 13553, March 9, 2020) and reallocation (85 FR 4601, January 27, 2020).

The Administrator, Alaska Region, NMFS, (Regional Administrator) has determined that jig vessels will not be able to harvest 1,100 mt of the 2020 Pacific cod TAC allocated to those vessels under § 679.20(a)(7)(ii)(A)(1) and catcher vessels greater than or equal to 60 feet (18.3 m) LOA using hook-and-line gear will not be able to harvest 274 mt of the 2020 Pacific cod TAC allocated to those vessels under § 679.20(a)(7)(ii)(A)(3).

Therefore, in accordance with § 679.20(a)(7)(iv)(C), NMFS apportions 1,100 mt of Pacific cod from the jig gear apportionment to the annual amount specified for catcher vessels less than 60 feet (18.3 m) LOA using hook-and-line or pot gear. Also, in accordance with § 679.20(a)(7)(iii)(A), NMFS reallocates 274 mt from the catcher vessels greater than or equal to 60 feet (18.3 m) LOA using hook-and-line gear apportionment to the annual amount specified for catcher vessels less than 60 feet (18.3 m) LOA using hook-and-line or pot gear.

The harvest specifications for 2020 Pacific cod included in final 2020 and 2021 harvest specifications for groundfish in the BSAI (85 FR 13553, March 9, 2020) and reallocation (85 FR

4601, January 27, 2020) are revised as follows: 178 mt to vessels using jig gear, 3 mt to catcher vessels greater than or equal to 60 feet (18.3 m) LOA using hook-and-line gear, and 4,807 mt to catcher vessels less than 60 feet (18.3 m) LOA using hook-and-line or pot gear.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR part 679, which was issued pursuant to section 304(b), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would allow for harvests that exceed the originally specified apportionment of the Pacific cod TAC.

NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of August 7, 2020.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 12, 2020.

Kelly Denit,

Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 200227–0066; RTID 0648–XA385]

Fisheries of the Exclusive Economic Zone Off Alaska; Several Groundfish Species in the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; apportionment of reserves; request for comments.

SUMMARY: NMFS apportions amounts of the non-specified reserve to the initial total allowable catch (ITAC) of Aleutian Islands (AI) Greenland turbot, AI trawl sablefish, Bering Sea (BS) trawl

sablefish, Bering Sea and Eastern Aleutian Islands (BS/EAI) blackspotted/rougheye rockfish, Bering Sea and Aleutian Islands (BSAI) Alaska plaice, BSAI Kamchatka flounder, BSAI octopuses, and BSAI “other flatfish”. This action is necessary to allow the fisheries to continue operating. It is intended to promote the goals and objectives of the fishery management plan for the BSAI management area.

DATES: Effective August 14, 2020, through 2400 hrs, Alaska local time, December 31, 2020. Comments must be received at the following address no later than 4:30 p.m., Alaska local time, August 31, 2020.

ADDRESSES: Submit your comments, identified by docket number NOAA–NMFS–2019–0074, by either of the following methods:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to <https://www.regulations.gov/docket?D=NOAA-NMFS-2019-0074> click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.

- **Mail:** Submit written comments to Glenn Merrill, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region NMFS. Mail comments to P.O. Box 21668, Juneau, AK 99802–1668.

Instructions: NMFS may not consider comments if they are sent by any other method, to any other address or individual, or received after the comment period ends. All comments received are a part of the public record and NMFS will post the comments for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender is publicly accessible. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT: Steve Whitney, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI exclusive economic zone according to the Fishery Management

Plan for Groundfish of the BSAI Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2020 ITAC of AI Greenland turbot was established as 149 metric tons (mt), the 2020 ITAC of AI trawl sablefish was established as 433 mt, the 2020 ITAC of BS trawl sablefish was established as 791 mt, the 2020 ITAC of BS/EAI blackspotted/rougheye rockfish was established as 72 mt, the 2020 ITAC of BSAI Alaska plaice was established as 14,450 mt, the 2020 ITAC of BSAI Kamchatka flounder was established as 5,780 mt, the 2020 ITAC of BSAI octopuses was established as 234, and the 2020 ITAC of BSAI “other flatfish” was established as 3,400 mt by the final 2020 and 2021 harvest specifications for groundfish of the BSAI (85 FR 13553, March 9, 2020). In accordance with § 679.20(a)(3) the Regional Administrator, Alaska Region, NMFS, has reviewed the most current available data and finds that the ITACs for AI Greenland turbot, AI trawl sablefish, BS trawl sablefish, BS/EAI blackspotted/rougheye rockfish, BSAI Alaska plaice, BSAI Kamchatka flounder, BSAI octopuses, and BSAI “other flatfish” need to be supplemented from the non-specified reserve to promote efficiency in the utilization of fishery resources in the BSAI and allow fishing operations to continue.

Therefore, in accordance with § 679.20(b)(3), NMFS apportions from the non-specified reserve of groundfish to ITACs in the BSAI management area as follows: 550 mt to AI Greenland turbot, 38 mt to AI trawl sablefish, 70 mt to BS trawl sablefish, 40 mt to BS/EAI blackspotted/rougheye rockfish, 3,000 mt to BSAI Alaska plaice, 800 mt to BSAI Kamchatka flounder, 450 mt to BSAI octopuses, and 200 mt to BSAI “other flatfish.” These apportionments are consistent with § 679.20(b)(1)(i) and do not result in overfishing of any target species because the revised ITACs and total allowable catches (TACs) are equal

to or less than the specifications of the acceptable biological catch in the final 2020 and 2021 harvest specifications for groundfish in the BSAI (85 FR 13553, March 9, 2020).

The harvest specification for the 2020 ITACs and TACs included in the harvest specifications for groundfish in the BSAI are revised as follows: 699 mt for AI Greenland turbot, 471 mt for AI trawl sablefish, 861 mt for BS trawl sablefish, 112 mt for BS/EAI blackspotted/rougheye rockfish, 17,450 mt for BSAI Alaska plaice, 6,580 mt for BSAI Kamchatka flounder, 684 mt for BSAI octopuses, and 3,600 mt for BSAI “other flatfish.”

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR part 679, which was issued pursuant to section 304(b), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest, as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the apportionment of the non-specified reserves of groundfish to the AI Greenland turbot, AI trawl sablefish, BS trawl sablefish, BS/EAI blackspotted/rougheye rockfish, BSAI Alaska plaice, BSAI Kamchatka flounder, BSAI octopuses, and BSAI “other flatfish”. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of August 7, 2020.

Under § 679.20(b)(3)(iii), interested persons are invited to submit written comments on this action (see **ADDRESSES**) until August 31, 2020.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 12, 2020.
