II. Background

On September 30, 2019, MSHA published a technical amendment, Examinations of Working Places in Metal and Nonmetal (MNM) Mines (84 FR 51400). The technical amendment recognized the legal effect of the D.C. Circuit Court's June 11, 2019, order and August 23, 2019, mandate that MSHA revise 30 CFR 56.18002 and 57.18002 to reinstate the regulatory provisions established by the Agency's January 23, 2017, final rule, Examinations of Working Places in Metal and Nonmetal Mines ("January 2017 rule") (82 FR 7680).

The reinstated January 2017 rule requires: (1) That an examination of the

working place be conducted at least once each shift before miners begin working in the place; (2) that operators notify miners in the affected areas of any conditions found that may adversely affect their safety or health; (3) that operators promptly initiate corrective actions; and (4) that a record be made of the examination. The final rule requires the examination record to include: The name of the person conducting the examination, the date of the examination, the location of all areas examined, a description of each condition found that may adversely affect the safety and health of miners, and the date of corrective action. The final rule also requires the operator to make the examination record available

to the authorized representative of the Secretary and miners' representatives and provide a copy upon request (84 FR 51400).

Currently, compliance assistance materials are available at <https://www.msha.gov/regulations/rulemaking/examinations-working-places-metal-and-nonmetal-mines>. These materials include Frequently Asked Questions and mine operators' sample templates and checklists provided as best practices.

David G. Zatezalo,

Assistant Secretary of Labor for Mine Safety and Health Administration.
