SUPPLEMENTARY INFORMATION:

I. Discussion

Based upon the application dated July 10, 2018, as supplemented October 22, 2018, July 1, 2019, July 25, 2019, and November 21, 2019, the NRC has issued a renewed license to the licensee for the Humboldt Bay ISFSI, located in

Humboldt County, California. The renewed license SNM–2514 authorizes and requires operation of the Humboldt Bay ISFSI in accordance with the provisions of the renewed license and its technical specifications. The renewed license will expire on November 17, 2065.

The licensee's application for a renewed license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the NRC's rules and regulations. The NRC has made appropriate findings as required by the Act and the NRC's regulations in Chapter 1 of title 10 of the Code of Federal Regulations (10 CFR), and sets forth those findings in the renewed license. The agency afforded an opportunity for a hearing in the Notice of Opportunity for a Hearing published in the Federal Register on December 26, 2018 (83 FR 66314). The NRC received no request for a hearing or petition for leave to intervene following the notice.

The NRC staff prepared a safety evaluation report for the renewal of the

ISFSI license and concluded, based on that evaluation that the ISFSI will continue to meet the regulations in 10 CFR part 72. The NRC staff also prepared an environmental assessment and finding of no significant impact for the renewal of this license, which were published on May 5, 2020 (85 FR 26734). The NRC staff's environmental assessment included the impacts of continued storage of spent nuclear fuel (as documented in NUREG-2157, "Generic Environmental Impact Statement for Continued Storage of Spent Fuel"). The NRC staff concluded that renewal of this ISFSI license will not have a significant impact on the quality of the human environment.

Commission.

ACTION: NUREG; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing NUREG—0090, Volume 42, "Report to Congress on Abnormal Occurrences: Fiscal Year 2019." The report describes those events that the NRC or an Agreement State identified as abnormal occurrences (AOs) during fiscal year (FY) 2019, based on the criteria defined in the report. The report describes nine events at Agreement State-licensed facilities and no events at NRC-licensed facilities.

DATES: NUREG-0090, Volume 42, is available June 22, 2020.

FOR FURTHER INFORMATION CONTACT:

Minh-Thuy Nguyen, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–5163, email: Minh-Thuy.Nguyen@nrc.gov.

SUPPLEMENTARY INFORMATION: Section 208 of the Energy Reorganization Act of 1974, as amended (Pub. L. 93–438), defines an "abnormal occurrence" as an unscheduled incident or event that the NRC determines to be significant from the standpoint of public health or safety. The AO report, NUREG—0090, Volume 42, "Report to Congress on Abnormal Occurrences: Fiscal Year 2019" (ADAMS Accession No. ML20162A165), describes those events that the NRC identified as AOs during FY 2019, based on the criteria defined in Appendix A of the report.

This report describes nine events in Agreement States and no events involving NRC licensees that were identified as AOs during FY 2019. Seven AOs were medical events as defined in title 10 of the Code of Federal Regulations (10 CFR) part 35, "Medical Use of Byproduct Material." One AO was a human exposure event and one AO involved the theft and recovery of Category 2 sources, as defined in 10 CFR part 37, "Physical Protection of Category 1 and Category 2 Quantities of Radioactive Material." The NRC did not identify any events at commercial nuclear power plants as AOs.

The NRC identified one event during FY 2019 that meets the guidelines for inclusion in Appendix B, "Other Events of Interest." The event received significant media coverage due to extensive contamination of personnel and building structures due to the breaching of a sealed cesium-137 source. No events meet the guidelines for inclusion in Appendix C, "Updates of Previously Reported Abnormal Occurrences."

Agreement States are the 39 U.S. States that currently have entered into formal agreements with the NRC pursuant to Section 274 of the Atomic Energy Act of 1954, as amended (AEA), to regulate certain quantities of AEA-

licensed material at facilities located within their borders.

The Federal Reports Elimination and Sunset Act of 1995 (Pub. L. 104–68) requires that AOs be reported to Congress annually. The full report, NUREG–0090, Volume 42, "Report to Congress on Abnormal Occurrences: Fiscal Year 2019," is also available electronically at the NRC's website at https://www.nrc.gov/reading-rm/doccollections/nuregs/staff/.
