

Stevens Fishery Conservation and Management Act to govern domestic and foreign fishing, and under authority of laws implementing international treaties.

Regulations at 50 CFR 660.704 require that all commercial fishing vessels with permits issued under authority of the National Marine Fishery Service's (NMFS) Fishery Management Plan for United States (U.S.) West Coast Highly Migratory Species Fisheries display the vessel's official number (U.S. Coast Guard documentation number or state registration number). The numbers must be of a specific size and format and located at specified locations. The official number must be affixed to each vessel subject to this section in block Arabic numerals at least 10 inches (25.40 centimeters) in height for vessels more than 25 feet (7.62 meters) but equal to or less than 65 feet (19.81 meters) in length; and 18 inches (45.72 centimeters) in height for vessels longer than 65 feet (19.81 meters) in length. Markings must be legible and of a color that contrasts with the background. The display of the identifying number aids in fishery law enforcement.

In the domestic West Coast Region fisheries regulated under 50 CFR part 660, the vessel's official number, United State Coast Guard (USCG) documentation or state registration number, is required to be displayed on the port and starboard sides of the deckhouse or hull, and on an appropriate weather deck. The number identifies each vessel and should be visible at distances at sea and in the air. The requirements affect United States (U.S.) vessels participating in the West Coast Highly Migratory Species (HMS) fisheries and West Coast coastal pelagic fishing vessels, with the exception of HMS Charter Recreational Vessels for which an exemption was granted and became effective September 5, 2007. Charter vessels are no longer bound by the vessel marking requirements under consideration.

The identification number provides law enforcement personnel with a means to monitor fishing, at-sea processing, and other related activities, in order to ascertain whether the vessel's observed activities are in accordance with those authorized for that vessel. The identifying number is used by the National Marine Fisheries Service (NMFS), the USCG, and other marine agencies in issuing citations, prosecutions, and other enforcement actions. Vessels that qualify for specific fisheries are easily identified, and this allows for more cost-effective enforcement. Cooperating fishermen also use this number to report

suspicious activities that they observe. Regulation-compliant fishermen ultimately benefit as unauthorized and illegal, unreported, and unregulated (IUU) fishing is deterred and more burdensome regulations are avoided.

II. Method of Collection

The vessels' official numbers are displayed on the vessels.

Type of Review: Request for a new OMB Control Number.

Affected Public: Individuals and households.

Estimated Number of Respondents: 2,000.

Estimated Total Annual Burden

Information will be gathered from those in the Bureau workforce, which includes Federal employees as well as contractors and other job statuses. The questionnaire may also be made available for use by other Federal agencies. The questionnaire asks about the respondent's recent experiences with unexpected financial shocks, the respondent's savings cushion available for emergencies, the respondent's savings behavior and savings vehicles. It includes the five-question version of the Bureau's Financial Well-Being Scale.

The Bureau can use the information collected to connect savings and financial well-being, and to inform future development of employer-sponsored financial education materials and programs.
