

these quotas as unchanged from 2019 and final.

The regulations at 50 CFR 648.75(b)(3) allow the Regional Administrator, to annually suspend, the minimum size limit for Atlantic surfclams unless discard, catch, and biological sampling data indicate that 30 percent or more of the Atlantic surfclam resource have a shell length less than 4.75 inches (121 mm) and the overall reduced size is not attributable to harvest from beds where growth of the individual clams has been reduced because of density-dependent factors. At its June 2019 meeting, the Council recommended the Regional Administrator suspend the minimum size limit for Atlantic surfclams for the 2020 fishing year. Commercial surfclam data for 2019 indicated that 22 percent of the overall commercial landings were composed of surfclams that were less than the 4.75-in (121-mm) default minimum size.

Based on the information available, the Regional Administrator concurs with the Council's recommendation, and is suspending the minimum size limit for Atlantic surfclams in the upcoming fishing year (January 1 through December 31, 2020).

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the Assistant Administrator for Fisheries, NOAA, has determined that this rule is consistent with the Atlantic Surfclam and Ocean Quahog FMP, other provisions of the Magnuson-Stevens Act, and other applicable law.

This action does not introduce any new reporting, recordkeeping, or other compliance requirements. This rule does not duplicate, overlap, or conflict with other Federal rules.

This rule is exempt from the requirements of E.O. 12866.

This rule is not expected to be an E.O. 13771 regulatory action because this rule is not significant under E.O. 12866.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed rule stage that this action would not have a significant economic impact on a substantial number of small entities. The factual basis for this certification was published in the proposed rule and is not repeated here. No comments were received regarding this certification. As a result, a regulatory flexibility analysis was not required and none was prepared.

RIN 0648-BJ43

Magnuson-Stevens Act Provisions; Fisheries Off West Coast States; Pacific Coast Groundfish Fishery; 2019–2020 Biennial Specifications and Management Measures; Inseason Adjustments; Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule; correcting amendments.

SUMMARY: NMFS published a final rule on January 3, 2020 that made routine inseason adjustments to management measures in commercial groundfish fisheries. This action corrects publication errors in the trip limit tables for non-individual fishing quota (IFQ) species and limited entry fixed gear (LEFG) vessels that were implemented through the final rule.

DATES: Effective February 13, 2020.

FOR FURTHER INFORMATION CONTACT: Karen Palmigiano, NMFS West Coast Regional Office, telephone: 206-526-4491 or email: karen.palmigiano@noaa.gov.

SUPPLEMENTARY INFORMATION:

Electronic Access

This final rule is accessible via the internet at the Office of the Federal Register's website at <http://www.gpoaccess.gov/fr/index.html>. Background information and documents are available at the Pacific Fishery Management Council's (Council's) website at <http://www.pcouncil.org/>.

Background

NMFS published a final rule (85 FR 250; January 3, 2020), effective January 2, 2020, that made routine inseason adjustments to management measures in commercial groundfish fisheries. The final rule implemented recommendations made by the Pacific

Fishery Management Council (Council) at its November 14–20, 2019 meeting. These recommendations included adjustments to the trip limits for vessels in the limited entry fixed gear (LEFG) and open access (OA) fisheries that are targeting sablefish, lingcod, the Minor Slope rockfish complex and darkblotched rockfish, the Minor Nearshore Rockfish complex, deeper nearshore rockfish complex, and bocaccio for 2020, as well as adjustments to the Shorebased individual fishing quota (IFQ) Program fishery trip limits for big skate for 2020. After publication of the final rule, three publication errors were noted.

Need for Correction

Three corrections are needed so that the implementing regulations are accurate and implement the adjustments to management measures as intended by the Council and described in the preamble of the final rule (85 FR 250).

First, the implementing regulations on pages 257 and 258 of the final rule (85 FR 250; January 3, 2020) for Tables 1 (North) and (South) to part 660, subpart D, included formatting errors that inadvertently removed the label for the big skate trip limits leaving a trip limit in Line 10 of each table without a species label. This correction would update Line 10 of each of the tables to include the label of “Big Skate” for those trip limits.

Second, the implementing regulations on page 260, Table 2 (South) to part 660, subpart E, inadvertently omitted the Council's recommended decrease to the trip limit for LEFG vessels targeting sablefish between 40°10' North latitude (N lat.) and 36° N lat. from “1,700 pounds (lb) (771 kilograms [kg]) per week, not to exceed 5,100 lb (2,313 kg) per two months” to “1,300 lb (560 kg) per week, not to exceed 3,900 (1,769 kg) per two months.” This correction would replace the current limit in Line 6 of Table 2 (South) with the new lower trip limit for LEFG vessels targeting sablefish between 40°10' N lat. and 36° N lat consistent with the Council's intent and as described in the preamble to the final rule.

Lastly, the implementing regulations on 260, Table 2 (South) to part 660, subpart E, included a formatting error in Line 39 that inadvertently removed the label for the Pacific cod trip limit leaving a trip limit in Line 39 without a species label. This action would update Line 39 of Table 2 (South) to include the label of “Pacific Cod” for the trip limits on Line 39.

Classification

Pursuant to 5 U.S.C. 553(b)(B), the Assistant Administrator for Fisheries (AA) finds there is good cause to waive prior notice and an opportunity for public comment on this correction, as notice and comment would be unnecessary and contrary to public interest. Notice and comment are unnecessary and contrary to the public interest because this action corrects inadvertent errors in regulations made in the final rule published on January 3, 2020 (85 FR 250), and immediate notice of the error and correction is necessary to prevent confusion among participants in the fishery that could result in issues with reporting, recordkeeping, and enforcement. To effectively correct the errors, the changes in this action must go into effect upon publication. In addition, notice and comment is unnecessary because this action makes only minor changes to correct the final rule. The public, states and the Council are aware of the correct intent of the regulations through the Council's public process used to develop the final rule and had the opportunity to comment on

these adjustments during public comment at the Council's November meeting. The preamble to the January 3, 2020, final rule also correctly describes the intent of the regulations. These corrections will not affect the results of analyses conducted to support management decisions in the Pacific Coast Groundfish fishery nor change any operating practices in the fishery.

For the same reasons stated above, the AA has determined that good cause exists to waive the 30-day delay in effectiveness pursuant to 5 U.S.C. 553(d). This notice makes only minor corrections to the final rule which was effective January 2, 2020. Delaying effectiveness of these corrections would result in conflicts in the regulations and confusion among fishery participants. Because prior notice and an opportunity for public comment are not required to be provided for this rule by 5 U.S.C. 553, or any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, are not applicable. Accordingly, no Regulatory Flexibility Analysis is required for this rule and none has been prepared.

This action is taken under the authority of 50 CFR 660.60(c) and is exempt from review under Executive Order 12866.

PART 660—FISHERIES OFF WEST COAST STATES

■ 1. The authority citation for part 660 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*, 16 U.S.C. 773 *et seq.*, and 16 U.S.C. 7001 *et seq.*

■ 2. Tables 1 (North) and (South) to part 660, subpart D are corrected to read as follows:

Table 1 (North) to Part 660, Subpart D -- Limited Entry Trawl Rockfish Conservation Areas and Landing Allowances for non-IFQ Species and Pacific Whiting North of 40°10' N. Lat.

This table describes Rockfish Conservation Areas for vessels using limited entry bottom trawl gear. This table describes incidental landing allowances for vessels registered to a Federal limited entry trawl permit and using groundfish trawl or groundfish non-trawl gears to harvest individual fishing quota (IFQ) species. This table will describe Block Area Closures for vessels using limited entry bottom trawl gear that are in effect for more than one year.

TABLE 1 (North)

1/ The Rockfish Conservation Area is a type of Groundfish Conservation Area, defined at §660.11, and defined by latitude and longitude

coordinates set out at §§ 660.71-660.74. This RCA is not defined by depth contours, and the boundary lines that define the RCA may close areas that are deeper or shallower than the depth contour. Vessels that are subject to the RCA restrictions may not fish in the RCA, or operate in the RCA for any purpose other than transiting. See §§660.112 and 660.130 for more information.

2/ As specified at §660.131(d), when fishing in the Eureka Area, no more than 10,000 lb of whiting may be taken and retained, possessed, or landed by a vessel that, at any time during the fishing trip, fished in the fishery management area shoreward of 100 fm contour.

3/ "Other Fish" are defined at § 660.11 and include kelp greenling off California and leopard shark.

TABLE 2 (South)

TABLE 2 (South)

1/ The Rockfish Conservation Area is an area closed to fishing by particular gear types, bounded by lines specifically defined by latitude and longitude coordinates set out at §§ 660.71-660.74. This RCA is not defined by depth contours (with the exception of the 20-fm depth contour boundary south of 42° N. lat.), and the boundary lines that define the RCA may close areas that are deeper or shallower than the depth contour. Vessels that are subject to RCA restrictions may not fish in the RCA, or operate in the RCA for any purpose other than transiting.

2/ POP is included in the trip limits for Minor Slope Rockfish. Blackgill rockfish have a species specific trip sub-limit within the Minor Slope Rockfish cumulative limit. Yellowtail rockfish are included in the trip limits for Minor Shelf Rockfish. Bronzespotted rockfish have a species specific trip limit.

3/ "Other Flatfish" are defined at § 660.11 and include butter sole, curfin sole, flathead sole, Pacific sanddab, rex sole, rock sole, and sand sole.

4/ "Shallow Nearshore" are defined at § 660.11 under "Groundfish" (7)(i)(B)(1).

5/ "Deeper Nearshore" are defined at § 660.11 under "Groundfish" (7)(i)(B)(2).

6/ The commercial minimum size limit for lingcod is 24 inches (61 cm) total length South of 42° N. lat.

7/ "Other Fish" are defined at § 660.11 and include kelp greenling off California and leopard shark.

To convert pounds to kilograms, divide by 2.20462, the number of pounds in one kilogram.
