FOR FURTHER INFORMATION CONTACT: Kit Dahl, Staff Officer, Pacific Council; telephone: (503) 820-2422.

SUPPLEMENTARY INFORMATION: The Council's Climate and Communities Core Team (CCCT) is coordinating a scenario planning process to explore potential fisheries management challenges under climate variability and change. During a two-day scenario development workshop in January 2020, more than 70 participants, including representatives from each of the Council's advisory bodies, developed four scenarios to be used in a stakeholder driven strategic planning process. This is designed to meet the CCI goal to consider strategies for improving the flexibility and responsiveness of our management actions to near-term climate shift and long-term climate change, and strategies for increasing the resiliency of our managed stocks and fisheries to those changes. The CCCT is now enhancing the clarity of descriptions for each of the four scenarios (also referred to as 'deepening' the scenarios). The purpose of this webinar series is to solicit input from the Council's advisory bodies on how possible future conditions described in each of these scenarios might affect the species and fisheries managed under the Council's fishery management plans.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery

Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.
