Title: Leasing, 12 CFR part 714.

Type of Review: Extension of a currently approved collection.

Abstract: Section 714.5 of NCUA's Regulations requires a federal credit union engaged in leasing to obtain or have on file financial documentation demonstrating that the guarantor of an estimated residual value has the resources to meet the guarantee. Estimated residual value is the projected future value of leased property at lease end. The accuracy of the estimated residual values used in a lease program is a fundamental element in the success or failure of a lease program. The higher the estimated residual values used by a federal credit union, the greater the potential for loss. To mitigate this risk, the leasing rule requires that if the amount of the estimated residual value relied on by the federal credit union to satisfy the full payout lease requirement exceeds 25 percent of the original cost of the leased property, the credit union must obtain a guarantee of the excess from a financially capable party. If the guarantor cannot meet its guarantee, a federal credit union may suffer serious financial loss. Accordingly, it is important that a federal credit union documents that a guarantor has the financial resources and capability to meet the guarantee. If the guarantor is an insurance company, the federal credit union may satisfy this record keeping requirement by obtaining and maintaining information demonstrating that the insurance company has a rating equivalent to a B+ or better from a major rating company.

The NRC CUI Program Challenge Request Process, also referred to as the “CUI Challenge Request Process” in this document, provides the process used for NRC Controlled Unclassified Information (CUI) authorized holders to challenge the designation of information that has been marked as CUI as improperly or incorrectly designated.

government purpose to possess the information. Any authorized holder who believes that the designation of specific information as CUI is improper or incorrect, or who believes they have received unmarked CUI, may use this process to formally notify the NRC CUI Senior Agency Official (SAO). The process also allows for the NRC CUI SAO and CUI Program Manager to process such requests and to issue a Final Decision from the CUI SAO.

The CUI Challenge Request Process is not intended to be used to address all disagreements regarding the proper designation of CUI. Authorized holders are encouraged to seek or utilize less formal means when resolving internal good faith disputes over the proper designation of information as CUI, such as discussion with the creator or designator of the information in dispute. Where resolution cannot be achieved through less formal means, the CUI challenge request process is available.

The CUI Challenge Request Process does not supersede any obligations under law or NRC policy to report information spills.

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the estimate of the burden of the information collection accurate?
