

improve the financial viability of the industry over the long-term.

*Recommendation To Ensure Sustainable Capacity Utilization and Financial Health*

Impose a Quota or Tariff on all steel products covered in this investigation imported into the United States to remove the threatened impairment to national security. The Secretary recommends adjusting the level of imports through a quota or tariff on steel imported into the United States.

Alternative 1—Global Quota or Tariff

1A. Global Quota

Impose quotas on all imported steel products at a specified percent of the 2017 import level, applied on a country and steel product basis.

According to the Global Trade Analysis Project (GTAP) Model, produced by Purdue University, a 63 percent quota would be expected to reduce steel imports by 37 percent (13.3 million metric tons) from 2017 levels. Based on imports from January to October, import levels for 2017 are projected to reach 36.0 million metric tons. The quotas, adjusted as necessary, would result in imports equaling about 22.7 million metric tons, which will enable an 80 percent capacity utilization rate at 2017 demand levels (including exports). Application of an annual quota will reduce the impact of the surge in steel imports that has occurred since the beginning of 2017.

1B. Global Tariff

Apply a tariff rate on all imported steel products, in addition to any antidumping or countervailing duty collections applicable to any imported steel product.

Similar to what is anticipated under a quota, according to the Global Trade Analysis Project (GTAP) Model, produced by Purdue University, a 24 percent tariff on all steel imports would be expected to reduce imports by 37 percent (*i.e.*, a reduction of 13.3 million metric tons from 2017 levels of 36.0 million metric tons).<sup>84</sup> This tariff rate would thus result in imports equaling about 22.7 million metric tons, which will enable an 80 percent capacity

utilization rate at 2017 demand levels (including exports).<sup>85</sup>

Alternative 2—Tariffs on a Subset of Countries

Apply a tariff rate on all imported steel products from Brazil, South Korea, Russia, Turkey, India, Vietnam, China, Thailand, South Africa, Egypt, Malaysia and Costa Rica, in addition to any antidumping or countervailing duty collections applicable to any steel products from those countries. All other countries would be limited to 100 percent of their 2017 import level.

According to the Global Trade Analysis Project (GTAP) Model, produced by Purdue University, a 53 percent tariff on all steel imports from this subset of countries would be expected to reduce imports by 13.3 million metric tons from 2017 import levels from the targeted countries. This action would enable an increase in domestic production to achieve an 80 percent capacity utilization rate at 2017 demand levels (including exports). The countries identified are projected to account for less than 4 percent of U.S. steel exports in 2017.

Exemptions

In selecting an alternative, the President could determine that specific countries should be exempted from the proposed 63 percent quota or 24 percent tariff by granting those specific countries 100 percent of their prior imports in 2017, based on an overriding economic or security interest of the United States. The Secretary recommends that any such determination should be made at the outset and a corresponding adjustment be made to the final quota or tariff imposed on the remaining countries. This would ensure that overall imports of steel to the United States remain at or below the level needed to enable the domestic steel industry to operate as a whole at an 80 percent or greater capacity utilization rate. The limitation to 100 percent of each exempted country's 2017 imports is necessary to prevent exempted countries from producing additional steel for export to the United States or encouraging other countries to seek to trans-ship steel to the United States through the exempted countries.

It is possible to provide exemptions from either the quota or tariff and still

meet the necessary objective of increasing U.S. steel capacity utilization to a financially viable target of 80 percent. However, to do so would require a reduction in the quota or increase in the tariff applied to the remaining countries to offset the effect of the exempted import tonnage.

Exclusions

The Secretary recommends an appeal process by which affected U.S. parties could seek an exclusion from the tariff or quota imposed. The Secretary would grant exclusions based on a demonstrated: (1) Lack of sufficient U.S. production capacity of comparable products; or (2) specific national security based considerations. This appeal process would include a public comment period on each exclusion request, and in general, would be completed within 90 days of a completed application being filed with the Secretary.

An exclusion may be granted for a period to be determined by the Secretary and may be terminated if the conditions that gave rise to the exclusion change. The U.S. Department of Commerce will lead the appeal process in coordination with the Department of Defense and other agencies as appropriate. Should exclusions be granted the Secretary would consider at the time whether the quota or tariff for the remaining products needs to be adjusted to increase U.S. steel capacity utilization to a financially viable target of 80 percent.

**Utility Scale Wind Towers From the Socialist Republic of Vietnam: Final Determination of Sales at Less Than Fair Value and Final Affirmative Determination of Critical Circumstances**

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** The Department of Commerce (Commerce) determines that imports of utility scale wind towers (wind towers) from the Socialist Republic of Vietnam

<sup>84</sup> Due to general equilibrium effects, the overall import level would need to decrease by more than the corresponding increase in domestic production to offset the negative effects of price or exchange rate changes on export demand.

<sup>85</sup> The elasticity factor is an estimate, not a certainty. A variation of 0.1 in the elasticity factor would change the tonnage reduction by about 375,000 tons. For example, imports would fall by an additional 375,000 tons under a demand elasticity of –1.7 instead of –1.6 and a 25 percent tariff.

(Vietnam) by CS Wind Group<sup>1</sup> are being, or are likely to be, sold in the United States at less than fair value (LTFV) for the period of investigation January 1, 2019 through June 30, 2019.

**DATES:** Applicable July 6, 2020.

**FOR FURTHER INFORMATION CONTACT:**

Joshua A. DeMoss, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-3362.

**SUPPLEMENTARY INFORMATION:**

**Background**

On July 9, 2019, the Wind Tower Trade Coalition (the petitioner) filed the antidumping duty Petition on wind towers from Vietnam.<sup>2</sup> The petitioner explained in the Petition its belief that CS Wind Vietnam Co., Ltd. (CS Wind) is the sole Vietnamese wind tower producer and exporter that is not subject to the *Existing Wind Towers Order* wind towers from Vietnam.<sup>3</sup> The petitioner noted that: “The U.S. International Trade Commission found that there were no imports of wind towers from Vietnamese firms other than CS Wind from 2012- June 2018. Therefore, we believe that all exports to the United States from Vietnam are produced by CS Wind and thus subject to this antidumping duty investigation.”<sup>4</sup>

On August 5, 2019, Commerce published the Initiation Notice in this investigation of wind towers from Vietnam.<sup>5</sup> In the Initiation Notice, we stated that this investigation applies to CS Wind and again noted that petitioner identified CS Wind as “the only Vietnamese wind tower producer that is not currently subject to the existing AD

order on wind towers from Vietnam.”<sup>6</sup> On February 14, 2020, Commerce published in the **Federal Register** the *Preliminary Determination* of sales at LTFV by CS Wind of wind towers from Vietnam.<sup>7</sup>

On February 27, 2020, Commerce postponed the deadline for the final determination until June 29, 2020.<sup>8</sup> We invited interested parties to comment on the *Preliminary Determination*. A summary of the events that occurred since Commerce published the *Preliminary Determination*, as well as a full discussion of the issues raised by parties for this final determination, may be found in the Issues and Decision Memorandum, which is adopted by this notice.<sup>9</sup>

**Clarification of the Respondent's Name**

In the *Preliminary Determination*, consistent with the information provided by the petitioners in the Petition, we stated that CS Wind is the only producer and exporter of wind towers in Vietnam not currently subject to the *Existing Wind Towers Order* from Vietnam.<sup>10</sup> However, the Petition also explained that it intended for the investigation to apply to the producer/exporter combination excluded from the *Existing Wind Towers Order*.<sup>11</sup> The companies excluded from the *Existing Wind Towers Order* are in fact the CS Wind Group, consisting of CS Wind and its owner, CS Wind Corporation, which were determined to be affiliated in that proceeding.<sup>12</sup> In addition, information on the record indicates that CS Wind was formerly known as CS Wind Tower

Co., Ltd.<sup>13</sup> and Commerce received a communication from U.S. Customs and Border Protection (CBP), requesting information as to whether the entity “CS Wind Tower Co., Ltd.” is the same company as the mandatory respondent CS Wind Vietnam Co., Ltd. “CS Wind Tower Co., Ltd.”<sup>14</sup> On the basis of this record information, we conclude that CS Wind Vietnam Co., Ltd. and CS Wind Tower Co., Ltd. are the same entity and will convey that understanding to CBP upon the issuance of this final determination.

Because nothing on the record indicates that the status of the entities in the CS Wind Group have changed, and as indicated in the Petition, *Initiation Notice*, and the *Preliminary Determination*, this investigation is intended to cover the producer and exporter combination excluded from the *Existing Wind Towers Order*, for purposes of the final determination, Commerce clarifies that this investigation covers wind towers produced and exported by the CS Wind Group, which includes CS Wind Vietnam Co., Ltd., otherwise known as CS Wind Tower Co., Ltd. (collectively, CS Wind) and its affiliated owner, CS Wind Corporation.<sup>15</sup>

**Scope of the Investigation**

The product covered by this investigation is wind towers from Vietnam. For a full description of the scope of this investigation, see the “Scope of the Investigation” in Appendix I of this notice.

**Scope Comments**

Commerce did not receive any scope comments and has not updated the scope of the investigation since the *Preliminary Determination*.

**Verification**

Because the mandatory respondent in this investigation did not provide necessary information requested by Commerce, we did not conduct verification.

<sup>1</sup> CS Wind Vietnam Co., Ltd. (also known as CS Wind Tower Co., Ltd.) and CS Wind Corporation (collectively, CS Wind Group) are the two entities that are directly involved in the production, export, and sale of subject merchandise. As explained in the Clarification of the Respondent's Name section *infra*, in this final determination we clarify that this investigation covers the CS Wind Group.

<sup>14</sup> See Commerce's Memo, “U.S. Customs and Border Protection Question,” dated June 18, 2020.

<sup>15</sup> See *Existing Wind Towers Order; Amended Final Determination*. See also Commerce's Memorandum, “CS Wind Entities,” dated concurrently with this memorandum (Final Analysis Memo).

Changes Since the Preliminary Determination and Use of Adverse Facts Available

Commerce has made no changes to the *Preliminary Determination*. As stated in the *Preliminary Determination*, we found that the application of facts available with an adverse inference with respect to the examined respondent was warranted, in accordance with sections 776(a) and (b) of the Tariff Act of 1930, as amended (the Act).<sup>16</sup>

Analysis of Comments Received

All issues raised in the case and rebuttal briefs submitted by parties in this investigation are addressed in the Issues and Decision Memorandum accompanying this notice. A list of the issues addressed in the Issues and

Decision Memorandum is attached to this notice as Appendix II. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/>. The signed and electronic versions of the Issues and Decision Memorandum are identical in content.

Final Affirmative Determination of Critical Circumstances

In accordance with section 733(e)(1) of the Act and 19 CFR 351.206, we

preliminarily determined that critical circumstances did exist with respect to imports of wind towers from Vietnam because the factors under section 773(e)(1)(A) of the Act were met. Our final determination remains unchanged. Accordingly, pursuant to section 735(a)(3) of the Act, we find that critical circumstances do exist with respect to imports of wind towers from Vietnam. For a full description of the methodology and results of Commerce's critical circumstances analysis, see the Issues and Decision Memorandum.

Final Determination

The final estimated weighted-average dumping margins are as follows:

Exporter and producer	Weighted-average dumping margin (percent)	Cash deposit rate (adjusted for subsidy offset) (percent) <sup>17</sup>
CS Wind Vietnam Co., Ltd. a/k/a CS Wind Tower Co., Ltd. <sup>18</sup> and CS Wind Corporation <sup>19</sup> (collectively, the CS Wind Group) .....	65.96	63.80

Continuation of Suspension of Liquidation

In accordance with section 735(c)(4)(A) of the Act, because we continue to find that critical circumstances exist, we will direct CBP to continue to suspend liquidation of all entries of wind towers, as described in Appendix I of this notice, which are entered, or withdrawn from warehouse, for consumption on or after November 16, 2019, which is 90 days prior to the date of publication in the **Federal Register** of the affirmative *Preliminary Determination*.

This investigation covers a single producer and exporter combination that is excluded from the *Existing Wind Towers Order* covering the same merchandise from Vietnam (A–552–814). Pursuant to section 735(c)(1) of the Act and 19 CFR 351.210(d), we will instruct CBP to require a cash deposit for such entries of merchandise equal to the estimated weighted-average dumping margin as follows: The cash deposit rate for the company listed in

the table above will be equal to the company-specific estimated weighted-average dumping margin identified for that company in the table. These suspension of liquidation instructions will remain in effect until further notice.

To determine the cash deposit rate, Commerce normally adjusts the estimated weighted-average dumping margin by the amount of export subsidies determined in a companion CVD proceeding when CVD provisional measures are in effect. Accordingly, where Commerce makes an affirmative determination for export subsidies, Commerce offsets the calculated estimated weighted-average dumping margin by the appropriate rate(s). In this case, we have found export subsidies for certain respondents. However, suspension of liquidation for provisional measures in the companion CVD case has been discontinued; therefore, we are not instructing CBP to collect cash deposits based upon the estimated weighted-average dumping margin adjusted for export subsidies at this time.

International Trade Commission Notification

In accordance with section 735(d) of the Act, we will notify the International Trade Commission (ITC) of the final affirmative determination of sales at LTFV. Because Commerce's final determination is affirmative, in accordance with section 735(b)(2) of the Act, the ITC will make its final determination as to whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports, or sales (or the likelihood of sales) for importation of wind towers from Vietnam no later than 45 days after this final determination. If the ITC determines that such injury does not exist, this proceeding will be terminated, and all cash deposits will be refunded. If the ITC determines that such injury does exist, Commerce will issue an antidumping duty order directing CBP to assess, upon further instruction by Commerce, antidumping duties on all imports of the subject

<sup>16</sup> See *Preliminary Determination* at 3–10.  
<sup>17</sup> In the companion countervailing duty (CVD) investigation, Commerce calculated a 2.16 percent export subsidy rate for CS Wind Vietnam Co., Ltd. See unpublished **Federal Register** notice titled “Utility Scale Wind Towers from the Socialist Republic of the Socialist Republic of Vietnam: Final Affirmative Countervailing Duty Determination,” dated concurrently with this notice, and accompanying Issues and Decision Memorandum.

<sup>18</sup> CS Wind Tower Co., Ltd. is a former name for CS Wind Vietnam Co., Ltd.; see also Final Analysis Memo.  
<sup>19</sup> In the *Preliminary Determination*, we stated that CS Wind is the only producer and exporter of wind towers in Vietnam not currently subject to the existing antidumping duty order on wind towers from Vietnam. See *Preliminary Determination* at 1 (citing *Existing Wind Towers Order*); and *Utility Scale Wind Towers from the Socialist Republic of Vietnam: Notice of Court Decision Not in Harmony With the Final Determination of Less Than Fair*

*Value Investigation and Notice of Amended Final Determination of Investigation*, 82 FR 15493 (March 29, 2017)). Commerce clarifies that this investigation covers wind towers excluded from the *Existing Wind Towers Order* (i.e., wind towers produced and exported by the CS Wind Group, which includes both CS Wind and CS Wind Corporation). For further information, see the Clarification of the Respondent's Name section, *supra*, Issues and Decision Memorandum, and Final Analysis Memo.

merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation, as discussed above in the "Continuation of Suspension of Liquidation" section.

#### Notification Regarding Administrative Protective Orders

This notice serves as a reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

#### Notification to Interested Parties

This determination is issued and published pursuant to sections 735(d) and 777(i)(1) of the Act, and 19 CFR 351.210(c).

Dated: June 29, 2020.

**Jeffrey I. Kessler,**

*Assistant Secretary for Enforcement and Compliance.*

#### Appendix I

##### Scope of the Investigation

The merchandise covered by this investigation consists of certain wind towers, whether or not tapered, and sections thereof. Certain wind towers support the nacelle and rotor blades in a wind turbine with a minimum rated electrical power generation capacity in excess of 100 kilowatts and with a minimum height of 50 meters measured from the base of the tower to the bottom of the nacelle (*i.e.*, where the top of the tower and nacelle are joined) when fully assembled.

A wind tower section consists of, at a minimum, multiple steel plates rolled into cylindrical or conical shapes and welded together (or otherwise attached) to form a steel shell, regardless of coating, end-finish, painting, treatment, or method of manufacture, and with or without flanges, doors, or internal or external components (*e.g.*, flooring/decking, ladders, lifts, electrical buss boxes, electrical cabling, conduit, cable harness for nacelle generator, interior lighting, tool and storage lockers) attached to the wind tower section. Several wind tower sections are normally required to form a completed wind tower.

Wind towers and sections thereof are included within the scope whether or not they are joined with nonsubject merchandise, such as nacelles or rotor blades, and whether or not they have internal or external components attached to the subject merchandise.

Specifically excluded from the scope are nacelles and rotor blades, regardless of whether they are attached to the wind tower.

Also excluded are any internal or external components which are not attached to the wind towers or sections thereof, unless those components are shipped with the tower sections.

Merchandise covered by this investigation is currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under subheading 7308.20.0020 or 8502.31.0000. Wind towers of iron or steel are classified under HTSUS 7308.20.0020 when imported separately as a tower or tower section(s). Wind towers may be classified under HTSUS 8502.31.0000 when imported as combination goods with a wind turbine (*i.e.*, accompanying nacelles and/or rotor blades). While the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of the investigation is dispositive.

#### Utility Scale Wind Towers From the Socialist Republic of Vietnam: Final Affirmative Countervailing Duty Determination and Negative Determination of Critical Circumstances

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** The Department of Commerce (Commerce) determines that countervailable subsidies are being provided to producers and exporters of utility scale wind towers (wind towers) from the Socialist Republic of Vietnam (Vietnam).

**DATES:** Applicable July 6, 2020.

##### FOR FURTHER INFORMATION CONTACT:

Davina Friedmann, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0698.

#### SUPPLEMENTARY INFORMATION:

##### Background

On December 13, 2020, Commerce published the *Preliminary Determination* of the countervailing duty (CVD) investigation, which aligned the final determination in this CVD investigation with the final determination in the companion antidumping duty (AD) investigation of utility scale wind towers from Vietnam.<sup>1</sup> On February 11, 2020, Commerce published its *Preliminary Determination of Critical Circumstances* in which we found that no critical circumstances exist for CS Wind or for all other producers or exporters for imports of wind towers from Vietnam.<sup>2</sup>

A summary of the events that occurred since Commerce published the *Preliminary Determination*, as well as a full discussion of the issues raised by parties for this final determination, may be found in the Issues and Decision Memorandum, which is hereby adopted by this notice.<sup>3</sup> The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/>. The signed and electronic versions of the Issues and Decision Memorandum are identical in content.

##### Period of Investigation

The period of investigation is January 1, 2018 through December 31, 2018.

##### Scope of the Investigation

The merchandise covered by this investigation is utility scale wind towers from Vietnam. For a complete
