SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 51.118 of title 10 of the *Code of Federal Regulations* (10 CFR), the NRC is making available final Supplement 6, Second Renewal to NUREG-1437, regarding the renewal of Virginia Electric and Power Company; Dominion Energy Virginia (Dominion), operating licenses DPR-32 and DPR-37 for an additional 20 years of operation for Surry Power Station, Unit Nos. 1 and 2 (Surry). A Notice of Availability of Draft Supplement 6, Second Renewal to NUREG-1437 was published in the **Federal Register** on October 25, 2019 (84 FR 57417 and 84 FR 56488), by the Environmental Protection Agency. The public comment period on draft Supplement 6, Second Renewal to NUREG-1437 ended on December 10, 2019, and the comments received are addressed in final Supplement 6, Second Renewal to NUREG-1437.

II. Discussion

As discussed in Chapter 5 of final Supplement 6, Second Renewal to NUREG-1437, the NRC staff determined that the adverse environmental impacts of subsequent license renewal for Surry are not so great that preserving the option of subsequent license renewal for energy-planning decisionmakers would not be unreasonable. This recommendation is based on: (1) The analysis and findings in the GEIS; (2) information provided in the environmental report and other documents submitted by Dominion; (3) consultation with Federal, State, Tribal,

and local agencies; (4) the NRC staff's independent environmental review; and (5) consideration of public comments received during the scoping process and on the draft Supplemental Environmental Impact Statement.

Dated: April 6, 2020.

For the Nuclear Regulatory Commission.

Robert B. Elliott,

Chief, Environmental Review License Renewal Branch, Division of Rulemaking, Environmental, and Financial Support, Office of Nuclear Material Safety and Safeguards.
