

Requirements, requires that certain large business contractors—

- Establish an acceptable cost estimating system and disclose the estimating system to the administrative contracting officer (ACO) in writing;
- Maintain the estimating system and disclose significant changes in the system to the ACO on a timely basis; and
- Respond in writing to written reports from the Government that identify deficiencies in the estimating system.

DoD contracting officers use this information to determine if the contractor has an adequate system for generating cost estimates, which forecasts costs based on appropriate source information available at the time, and has the ability to monitor the correction of significant deficiencies. The need for information collection decreases as contractor estimating systems improve and gain contracting officer approval.

DEFENSE NUCLEAR FACILITIES SAFETY BOARD

Recommendation 2020–01

AGENCY: Defense Nuclear Facilities Safety Board.

ACTION: Notice; recommendation.

SUMMARY: The Defense Nuclear Facilities Safety Board has made a Recommendation to the Secretary of Energy concerning the Department of Energy's regulatory framework to ensure adequate protection of public health and safety at defense nuclear facilities. Pursuant to the requirements of the Atomic Energy Act of 1954, as amended, the Defense Nuclear Facilities Safety Board is publishing the Recommendation and associated correspondence with the Department of Energy and requesting comments from interested members of the public.

DATES: Comments, data, views, or arguments concerning the recommendation are due on or by April 13, 2020.

ADDRESSES: Send comments concerning this notice to: Defense Nuclear Facilities Safety Board, 625 Indiana Avenue NW, Suite 700, Washington, DC 20004–2001. Comments may also be submitted by email to comment@dnfsb.gov.

FOR FURTHER INFORMATION CONTACT: Tara Tadlock at the address above or telephone number (202) 694–7000.

SUPPLEMENTARY INFORMATION:

Recommendation 2020–01 to the Secretary of Energy

Nuclear Safety Requirements, Pursuant to 42 U.S.C. 2286a(b)(5), Atomic Energy Act of 1954, as Amended

Introduction. The Department of Energy's (DOE) defense nuclear facilities

and associated infrastructure are aging, but DOE will continue to use many of the facilities and much of the infrastructure for the foreseeable future. Consequently, the safety systems and features that were designed into the buildings or installed during construction are also aging. At the same time, DOE is proposing, designing, and building new defense nuclear facilities to support its continued mission. DOE needs to maintain a robust safety posture and strong regulatory framework to ensure that both its aging facilities and infrastructure and its new facilities provide adequate protection of public health and safety. DOE will need clear requirements and guidance for its staff to follow and enforce.

Background. DOE Policy 420.1, Nuclear Safety Policy, states, "It is the policy of the Department of Energy to design, construct, operate, and decommission its nuclear facilities in a manner that ensures adequate protection of workers, the public, and the environment." Title 10 Code of Federal Regulations (CFR) 830, Nuclear Safety Management, provides a foundation of requirements upon which DOE relies to ensure adequate protection of workers, the public, and the environment. With this rule, DOE has developed a robust regulatory framework—including orders, guides, and standards—to provide the requirements and guidance for the safe design, construction, operation, and decommissioning of its defense nuclear facilities.

10 CFR 830 captures the fundamental requirements for nuclear safety management to ensure contractors perform work "with the hazard controls that ensure adequate protection of workers, the public, and the environment." DOE provides additional requirements in orders and standards. These additional requirements may be imposed on contractors by reference in regulations or by contract. DOE also provides non-mandatory guidance in guides, handbooks, and manuals.

In its initial Notice of Proposed Rulemaking creating 10 CFR 830,¹ DOE noted:

The [Price-Anderson Amendments Act of 1988], coupled with DOE efforts to improve the assurance of safety in its nuclear operations, led DOE to conclude that basic DOE nuclear safety requirements should be established through rulemaking. These requirements would revise and supplement the existing requirements, and in particular, establish specific requirements for applicable DOE
