

TABLE 2—TEST STANDARDS OSHA IS ADDING TO THE NRTL PROGRAM'S LIST OF APPROPRIATE TEST STANDARDS

Test standard	Test standard title
UL 2524	In-Building 2-Way Emergency Radio Communication Enhancement Systems.
ANSI Z83.26 ..	Gas-Fired Outdoor Infrared Patio Heaters.
ANSI Z21.89 ..	Outdoor Cooking Specialty Gas Appliances.

OSHA's recognition of any NRTL for a particular test standard is limited to equipment or materials for which OSHA standards require third-party testing and certification before using them in the workplace. Consequently, if a test standard also covers any products for which OSHA does not require such testing and certification, a NRTL's scope of recognition does not include these products.

A. Conditions

In addition to those conditions already required by 29 CFR 1910.7, SGS must abide by the following conditions of the recognition:

1. SGS must inform OSHA as soon as possible, in writing, of any change of ownership, facilities, or key personnel, and of any major change in the operations as a NRTL, and provide details of the change(s);

2. SGS must meet all the terms of the recognition and comply with all OSHA policies pertaining to this recognition; and

3. SGS must continue to meet the requirements for recognition, including all previously published conditions on SGS's scope of recognition, in all areas for which it has recognition.

Pursuant to the authority in 29 CFR 1910.7, OSHA hereby expands the scope of recognition of SGS, subject to the limitation and conditions specified above. OSHA also adds one new test standard to the NRTL Program's List of Appropriate Test Standards.

III. Authority and Signature

Loren Sweatt, Principal Deputy Assistant Secretary of Labor for Occupational Safety and Health, authorized the preparation of this notice. Accordingly, the agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor's Order No. 1–2012 (77 FR 3912, Jan. 25, 2012), and 29 CFR 1910.7.

Signed at Washington, DC, on March 18, 2020.

Loren Sweatt,

Principal Deputy Assistant Secretary of Labor for Occupational Safety and Health.

[FR Doc. 2020–06084 Filed 3–23–20; 8:45 am]

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2013–0012]

Modification to the List of Appropriate NRTL Program Test Standards and the Scopes of Recognition of Several NRTLs

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: In this notice, OSHA announces the final decision to: (1) Add one new test standard to the Nationally Recognized Testing Laboratories (NRTL) Program's list of appropriate test standards; (2) delete or replace several test standards from the NRTL Program's list of appropriate test standards; and (3) update the scope of recognition of several NRTLs.

DATES: The actions contained in this notice will become effective on March 24, 2020.

FOR FURTHER INFORMATION CONTACT:

Information regarding this notice is available from the following sources:

Press inquiries: Contact Mr. Frank Meilinger, Director, OSHA Office of Communications; telephone: (202) 693–1999; email: meilinger.francis2@dol.gov.

General and technical information: Contact Mr. Kevin Robinson, Director, Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration; telephone: (202) 693–2110 or email: robinson.kevin@dol.gov. OSHA's web page includes information about the NRTL Program (see <http://www.osha.gov/dts/otpca/nrtl/index.html>).

SUPPLEMENTARY INFORMATION:

I. Background

The NRTL Program recognizes organizations that provide product-safety testing and certification services to manufacturers. These organizations perform testing and certification for purposes of the program, to U.S. consensus-based product-safety test standards. The products covered by the NRTL Program consist of those items for which OSHA safety standards require

“certification” by a NRTL. The requirements affect electrical products and 38 other types of products. OSHA does not develop or issue these test standards, but generally relies on standards development organizations (SDOs), which develop and maintain the standards using a method that provides input and consideration of views of industry groups, experts, users, consumers, governmental authorities and others having broad experience in the safety field involved.

Addition of New Test Standards to the NRTL List of Appropriate Test Standards

Periodically, OSHA will add new test standards to the NRTL list of appropriate test standards following an evaluation of the test standard document. To qualify as an appropriate test standard, the agency evaluates the document to (1) verify it represents a product category for which OSHA requires certification by a NRTL, (2) verify the document represents an end product and not a component, and (3) verify the document defines safety test specifications (not installation or operational performance specifications). OSHA becomes aware of new test standards through various avenues. For example, OSHA may become aware of new test standards by: (1) Monitoring notifications issued by certain SDOs; (2) reviewing applications by NRTLs or applicants seeking recognition to include a new test standard in their scopes of recognition; and (3) obtaining notification from manufacturers, manufacturing organizations, government agencies, or other parties that a new test standard may be appropriate to add to the list of appropriate standards. OSHA may determine to include a new test standard in the list, for example, if the test standard is for a particular type of product that another test standard also covers, addresses a type of product that no standard previously covered, or is otherwise new to the NRTL Program.

SDO Deletion and Replacement of Test Standards

The NRTL Program regulations require that appropriate test standards be maintained and current (29 CFR 1910.7(c)). A test standard withdrawn by a standards development organization is no longer considered an appropriate test standard (CPL 01–00–004, NRTL Program Policies, Procedures and Guidelines Directive, Chapter 2, IX). It is OSHA's policy to remove recognition of withdrawn test standards by issuing a correction notice in the **Federal Register** for all NRTLs

recognized for the withdrawn test standards. However, SDOs frequently will designate a replacement standard for withdrawn standards. OSHA will recognize a NRTL for an appropriate replacement test standard if the NRTL has the requisite testing and evaluation capability for the replacement test standard.

One method that NRTLs may use to show such capability involves an analysis to determine whether any testing and evaluation requirements of existing test standards in a NRTL's scope are comparable (*i.e.*, are completely or substantially identical) to the requirements in the replacement test standard. If OSHA's analysis shows the replacement test standard does not require additional or different technical capability than an existing test standard(s), and the replacement test standard is comparable to the existing test standard(s), then OSHA can add the replacement test standard to affected NRTLs' scopes of recognition. If OSHA's analysis shows the replacement test standard requires an additional or different technical capability, or the replacement test standard is not comparable to any existing test standards, each affected NRTL seeking to have OSHA add the replacement test standard to the NRTL's scope of recognition must provide information to OSHA that demonstrates technical capability.

Other Reasons for Removal of Test Standards From the NRTL List of Appropriate Test Standards

OSHA may choose to remove a test standard from the NRTL Program's List of Appropriate Test Standards based on an internal review in which NRTL Program staff review the NRTL Program's List of Appropriate Test Standards to determine if the test standards conform to the definition of an appropriate test standard defined in NRTL Program regulations and policy. There are several reasons for removing a test standard based on this review. First, a document that provides the methodology for a single test is a test method rather than an appropriate test standard (29 CFR 1910.7(c)). As stated above, a test standard must specify the safety requirements for a specific type of product(s). A test method, however, is a specified technical procedure for performing a test, as such, a test method is not an appropriate test standard. While a NRTL may use a test method to

determine if certain safety requirements are met, a test method is not itself a safety requirement for a specific product category.

Second, a document that focuses primarily on usage, installation, or maintenance requirements would also not be considered an appropriate test standard (NRTL Program Policies, Procedures and Guidelines Directive, CPL-01-00-004, Chapter 2, Section VIII, B). In some cases, however, a document may also provide safety test specifications in addition to usage, installation, and maintenance requirements. In such cases, the document would be retained as an appropriate test standard based on the safety test specifications.

Finally, a document may not be considered an appropriate test standard if the document covers products for which OSHA does not require testing and certification (NRTL Program Policies, Procedures and Guidelines Directive, CPL-01-00-004, Chapter 2, Section VIII, B). Similarly, a document that covers electrical product components would not be considered an appropriate test standard. These documents apply to types of components that have limitation(s) or condition(s) on their use, which are not appropriate for use as end-use products. These documents also specify that these types of components are for use only as part of an end-use product. NRTLs, however, evaluate such components only in the context of evaluating whether end-use products requiring NRTL approval are safe for use in the workplace. Testing such components alone would not indicate that the end-use products containing the components are safe for use. Accordingly, as a matter of policy, OSHA considers that documents covering such components are not appropriate test standards under the NRTL Program. OSHA notes, however, that it is not proposing to delete from NRTLs' scope of recognition any test standards covering end-use products that contain such components.¹

In addition, OSHA notes that, to conform to a test standard covering an end-use product, a NRTL must still determine that the components in the product comply with the components' specific test standards. In making this determination, NRTLs may test the components themselves, or accept the testing of a qualified testing organization that a given component

conforms to the particular test standard. OSHA reviews each NRTL's procedures to determine which approach the NRTL will use to address components, and reviews the end-use product testing to verify the NRTL appropriately addresses that product's components.

Proposed Modification to the List of Appropriate NRTL Program Test Standards and the Scope of Recognition of Several NRTLs

In an April 10, 2019 **Federal Register** notice (84 FR 14412, referred to in this notice as "Proposed Modification," and available at www.regulations.gov under Docket ID OSHA-2013-0012-0011), OSHA proposed: Deleting several withdrawn and deleted test standards from the NRTL Program's list of appropriate test standards; incorporating into the NRTL Program's list of appropriate test standards replacement test standards for some of the withdrawn and deleted test standards; and updating the scope of recognition of several NRTLs. In response to this notice, two comments (OSHA-2013-0012-0023) and (OSHA-2013-0012-0024) were received from the public after the comment period ended. The comments were not related to this **Federal Register** notice, and OSHA has not made any modifications to this notice based on these comments.

OSHA further published a **Federal Register** notice regarding insulating links on March 14, 2019 (84 FR 9384) and announced the final decision on July 29, 2019 (84 FR 35887). This **Federal Register** notice addressed the issue raised in the comments within 84 FR 14412. Therefore the issue raised in the comments will not be addressed in this notice.

II. Final Decision To Add a New Test Standard to the NRTL Program's List of Appropriate Test Standards

In this notice, OSHA announces the final decision to add one test standard, UL 61010-2-061, Electrical Equipment for Measurement, Control and Laboratory Use—Part 2-061: Particular Requirements for Laboratory Atomic Spectrometers with Thermal Atomization and Ionization to the NRTL Program's list of appropriate test standards. In the Proposed Modification, OSHA proposed replacing withdrawn standards with nine standards, eight of which are already included in the NRTL Program's list of appropriate test standards. The standard

¹ OSHA notes also that some types of devices covered by these documents, such as capacitors and transformers, may be end-use products themselves, and tested under other test standards applicable to

such products. For example, the following test standard covers transformers that are end-use products: UL 1562 Standard for Transformers, Distribution, Dry-Type—Over 600 Volts. OSHA is

not proposing to delete such test standards from NRTLs' scopes of recognition.

OSHA will add to the NRTL Program's list of appropriate test standards is outlined below in Table 1 below:

TABLE 1—TEST STANDARD OSHA IS ADDING TO THE NRTL PROGRAM'S LIST OF APPROPRIATE TEST STANDARDS

Test standard No.	Test standard title
UL 61010–2–061	Electrical Equipment for Measurement, Control and Laboratory Use—Part 2–061: Particular Requirements for Laboratory Atomic Spectrometers with Thermal Atomization and Ionization.

II. Final Decision To Remove a Test Standard to the NRTL Program's List of Appropriate Test Standards

In this notice, OSHA announces the final decision to delete twenty-nine

withdrawn and deleted test standards from the NRTL Program's List of Appropriate Test Standards. OSHA also incorporates into the NRTL Program's List of Appropriate Test Standards

replacement test standards for some of the withdrawn and deleted test standards as described below in Table 2:

TABLE 2—TEST STANDARDS OSHA IS REMOVING FROM NRTL PROGRAM'S LIST OF APPROPRIATE TEST STANDARDS

Deleted test standard	Test standard title	Reason for deletion	Replacement standard(s)
ANSI C37.44	Distribution Oil Cutouts and Fuse Links	Withdrawn	None.
IEEE C37.09	Standard Test Procedure for High-Voltage Circuit Breakers Rated on a Symmetrical Current Basis.	Withdrawn	None.
IEEE C37.29	Low-Voltage AC Power Circuit Protectors Used in Enclosures.	Withdrawn	None.
IEEE C37.45	Distribution Enclosed Single-Pole Air Switches.	Withdrawn	None.
NEMA C37.52	Low-Voltage AC Power Circuit Protectors Used in Enclosures—Test Procedures.	Withdrawn	None.
IEEE C37.53	High-Voltage Current Motor-Starter Fuses—Conformance Test Procedures.	Withdrawn	None.
ISA 82.02.01	Electric and Electronic Test, Measuring, Controlling and Related Equipment: General Requirement.	Withdrawn	None.
UL 1093	Halogenated Agent Fire Extinguishers	Withdrawn	None.
UL 1244	Electrical and Electronic Measuring and Testing Equipment.	Withdrawn	None.
UL 1448	Electric Hedge Trimmers	Withdrawn and replaced ..	UL 60745–2–15 Particular Requirements for Hedge Trimmers.

III. Final Decision To Modify Affected NRTLs' Scope of Recognition

In this notice, OSHA announces the final decision to update the scope of

recognition of several NRTLs. The tables in this section (Table 3 thru Table 10) list, for each affected NRTL, the test standard(s) that OSHA will delete from the scope of recognition and, when

applicable, the test standard(s) that OSHA will incorporate into the scope of recognition to replace withdrawn (and deleted) test standards.

TABLE 3—TEST STANDARDS OSHA IS REMOVING FROM THE SCOPE OF RECOGNITION OF THE CANADIAN STANDARDS ASSOCIATION

Test standard(s) being removed	Reason for removal	Replacement test standard(s) (if applicable)
UL 61010A-2-020—Electrical Equipment for Laboratory Use; Part 2: Particular Requirements for Laboratory Equipment for Laboratory Centrifuges.	Standard withdrawn by Standards Organization. UL 61010C-1 Process Control Equipment	Withdrawn and replaced	UL 61010-1 Electrical Equipment for Measurement, Control and Laboratory Use; Part 1: General Requirements.

OSHA will place on its informational web pages the modifications to each NRTL's scope of recognition. These web pages detail the scope of recognition for each NRTL, including the test standards the NRTL may use to test and certify products under OSHA's NRTL Program. OSHA also will add to the list of "Appropriate Test Standards" web page, those test standards added to the NRTL Program's List of Appropriate Test Standards. The agency will add to the "Standards No Longer Recognized" web page those test standards that OSHA no longer recognizes or permits under the NRTL Program. Access to these web pages is available at <http://www.osha.gov/dts/otpc/nrtl/index.html>.

IV. Authority and Signature

Loren Sweatt, Principal Deputy Assistant Secretary of Labor for Occupational Safety and Health, authorized the preparation of this notice. Accordingly, the agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2)), Secretary of Labor's Order No. 1–2012 (77 FR 3912, Jan. 25, 2012), and 29 CFR 1910.7.

Signed at Washington, DC, on March 19, 2020.

Loren Sweatt,

Principal Deputy Assistant Secretary of Labor for Occupational Safety and Health.

[FR Doc. 2020–06144 Filed 3–23–20; 8:45 am]

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2019–0009]

DEKRA Certification Inc.: Application for Recognition and Proposed Modification to the NRTL Program's List of Appropriate Test Standards

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: In this notice, OSHA announces the application of DEKRA Certification, Inc., for recognition as a Nationally Recognized Testing Laboratory (NRTL) and presents the agency's preliminary finding to grant this recognition. Additionally, OSHA proposes to modify the NRTL Program's List of Appropriate Test Standards to add two additional test standards.

DATES: Submit comments, information, and documents in response to this notice, or requests for an extension of time to make a submission, on or before April 23, 2020.

ADDRESSES: Submit comments by any of the following methods:

Electronically: You may submit comments and attachments electronically at: <https://www.regulations.gov>, which is the Federal eRulemaking Portal. Follow the instructions online for submitting comments.

Facsimile: If your comments, including attachments, are not longer than 10 pages, you may fax them to the OSHA Docket Office at (202) 693–1648.

Mail, hand delivery, express mail, messenger, or courier service: When using this method, you must submit a copy of your comments and attachments to the OSHA Docket Office, Docket No. OSHA–2019–0009, Occupational Safety and Health Administration, U.S. Department of Labor, Room N–3653, 200 Constitution Avenue NW, Washington, DC 20210. Deliveries (hand, express mail, messenger, and courier service) are accepted during the Docket Office's normal business hours, 10:00 a.m. to 3:00 p.m., ET.

Instructions: All submissions must include the agency name and OSHA docket number (OSHA–2019–0009). All comments, including any personal information you provide, are placed in the public docket without change, and may be made available online at <https://www.regulations.gov>. Therefore, the agency cautions commenters about submitting statements they do not want made available to the public, or submitting comments that contain personal information (either about themselves or others) such as Social Security numbers, birth dates, and medical data.

Docket: To read or download comments or other material in the docket, go to <https://www.regulations.gov> or the OSHA Docket Office at the above address. All documents in the docket (including this **Federal Register** notice) are listed in the <https://www.regulations.gov> index; however, some information (e.g., copyrighted material) is not publicly available to read or download through the website. All submissions, including copyrighted material, are available for inspection at the OSHA Docket Office. Contact the OSHA Docket Office for assistance in locating docket submissions.

Extension of comment period: Submit requests for an extension of the comment period on or before April 23, 2020 to the Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution

Avenue NW, Room N–3653, Washington, DC 20210, or by fax to (202) 693–1644.

FOR FURTHER INFORMATION CONTACT:

Information regarding this notice is available from the following sources:

Press inquiries: Contact Mr. Frank Meilinger, Director, OSHA Office of Communications, U.S. Department of Labor, telephone: (202) 693–1999; email: meilinger.francis2@dol.gov.

General and technical information: Contact Mr. Kevin Robinson, Director, Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, phone: (202) 693–2110 or email: robinson.kevin@dol.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Many of OSHA's workplace standards require that a NRTL test and certify certain types of equipment as safe for use in the workplace. NRTLs are independent laboratories that meet OSHA's requirements for performing safety testing and certification of products used in the workplace. To obtain and retain OSHA recognition, the NRTLs must meet the requirements in the NRTL Program regulations at 29 CFR 1910.7. More specifically, to be recognized by OSHA, an organization must: (1) Have the appropriate capability to test, evaluate, and approve products to assure their safe use in the workplace; (2) be completely independent of employers subject to the tested equipment requirements, and manufacturers and vendors of products for which OSHA requires certification; (3) have internal programs that ensure proper control of the testing and certification process; and (4) have effective reporting and complaint handling procedures. Recognition is an acknowledgement by OSHA that the NRTL has the capabilities to perform independent safety testing and certification of the specific products covered within the NRTL's scope of recognition and is not a delegation or grant of government authority. Recognition of a NRTL by OSHA also allows employers to use products certified by that NRTL to meet those OSHA standards that require product testing and certification.

The agency processes applications for initial recognition following requirements in Appendix A of 29 CFR 1910.7. This appendix requires OSHA to publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the
