SUPPLEMENTARY INFORMATION:**I. Background**

The Department of Labor, as part of a continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance process to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, the reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act, or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires OSHA to obtain such information with a minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining said information (29 U.S.C. 657).

The basic purpose of the information collection requirements in the Ionizing Radiation Standard is to document that employers are providing their workers with protection from ionizing radiation exposure. The information collection requirements contained in the Standard

include: Monitoring worker exposure to ionizing radiation, posting caution signs at radiation areas, reporting worker overexposures to OSHA, maintaining exposure records, and providing exposure records to current and former workers.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply—for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting an adjustment increase of 7,064 burden hours from 52,016 to 59,080 hours. This increase is the result of an estimated increase of 5% in the number of potentially exposed employees. The total estimated number of establishments affected by the regulation decreased from 13,849 to 13,135, a total adjustment of 714 less establishments, based on updated data.

Type of Review: Extension of a currently approved collection.

AGENCY: National Archives and Records Administration (NARA).

ACTION: Correction notice.

SUMMARY: We previously published notice that we were proposing to request Office of Management and Budget (OMB) approval to renew NARA information collections 3095–0035, which relates to copier-to-copier reproduction requests, and 3095–0038 and 3095–0039, which relate to requests for documents or information from former military personnel and medical records, military personnel and family medical records, or personnel and medical records of former Federal civilian employees.
