With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants are requested not to include copyrighted materials in their submission.

The Commission will issue a notice or order granting or denying a hearing request or intervention petition, designating the issues for any hearing that will be held and designating the Presiding Officer. A notice granting a hearing will be published in the **Federal Register** and served on the parties to the hearing.

If a person (other than Duke Energy) requests a hearing, that person shall set forth with particularity the manner in which his interest is adversely affected by this Confirmatory Order and shall address the criteria set forth in 10 CFR 2.309(d) and (f).

If a hearing is requested by a person whose interest is adversely affected, the

Commission will issue an order designating the time and place of any hearings. If a hearing is held, the issue to be considered at such hearing shall be whether this Confirmatory Order should be sustained.

In the absence of any request for hearing, or written approval of an extension of time in which to request a hearing, the provisions specified in Section V above shall be final 30 days from the date of this Confirmatory Order without further order or proceedings. If an extension of time for requesting a hearing has been approved, the provisions specified in Section V shall be final when the extension expires if a hearing request has not been received.

## SUPPLEMENTARY INFORMATION:

### I. Discussion

The NRC has terminated License No. SNM-180, held by UTX-A at its Nuclear Engineering Teaching Laboratory (NETL). The NETL used SNM to supplement its training program in the field of nuclear engineering. The licensed materials were to be used in experiments in the NETL at the J.J. Pickle Research Campus in Austin, Texas. The license was most recently renewed on November 13, 2009 and was due for renewal in November 2019. Instead, due to a change in the direction of research activities at the NETL resulting in the disuse of licensed SNM, UTX-A arranged to ship the licensed SNM to the U.S. Department of Energy (DOE) in Oak Ridge, Tennessee. By letter dated November 15, 2019, the NETL forwarded notification to the NRC that packaging and shipment to DOE had been completed.

UTX-A's initial license was issued February 27, 1958, and the most recent renewal was issued on November 13, 2009. However, the SNM licensed for use by UTX-A had been in storage and unused since prior to the last license renewal. An application to terminate the license was received by the NRC on
