

accessible. Any personal identifying information (e.g., name, address) submitted voluntarily by the sender may also be publicly accessible. NOAA will accept anonymous comments. To participate in the public meeting Wednesday, September 9, 2020 at 4:00 p.m. CDT, registration is required two hours in advance by 2:00 p.m. CDT.

**Registration:** [http://noaaesc.adobeconnect.com/lsnerrpublicmeeting/event/event\\_info.html](http://noaaesc.adobeconnect.com/lsnerrpublicmeeting/event/event_info.html). You may participate online or by phone. If you would like to provide comment during the public meeting, please select “yes” during the online registration. The line-up of speakers will be based on your date and time of registration.

**FOR FURTHER INFORMATION CONTACT:** Ralph Cantral, Evaluator, NOAA Office for Coastal Management by phone at (301) 233-2998 or email [Ralph.Cantral@noaa.gov](mailto:Ralph.Cantral@noaa.gov). Copies of the previous evaluation findings and reserve’s management plan and site profile may be viewed and downloaded on the internet at <http://coast.noaa.gov/czm/evaluations>. A copy of the evaluation notification letter and most recent progress reports may be obtained upon request by contacting Ralph Cantral.

**SUPPLEMENTARY INFORMATION:** Section 312 of the Coastal Zone Management Act (CZMA) requires NOAA to conduct periodic evaluations of federally approved state coastal programs and national estuarine research reserves. The process includes one or more public meetings, consideration of written public comments, and consultations with interested Federal, state, and local agencies and members of the public. For the evaluation of the Lake Superior National Estuarine Research Reserve, NOAA will consider the extent to which the state has met the national objectives, adhered to its management plan approved by the Secretary of Commerce, and adhered to the terms of financial assistance under the Coastal Zone Management Act.

When the evaluation is completed, NOAA’s Office for Coastal Management will place a notice in the **Federal Register** announcing the availability of the Final Evaluation Findings.

**Keelin Kuipers,**

*Deputy Director, Office for Coastal Management, National Ocean Service, National Oceanic and Atmospheric Administration.*

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

#### Upcoming Changes to the National Spatial Reference System (NSRS)

**AGENCY:** The Office of the National Geodetic Survey (NGS), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

**ACTION:** Notice of upcoming changes.

**SUMMARY:** The National Geodetic Survey (NGS) is in the process of modernizing the National Spatial Reference System (NSRS) and plans to replace all three North American Datum of 1983 (NAD 83) frames and all vertical datums, including the North American Vertical Datum of 1988 (NAVD 88), with four new terrestrial reference frames and one new geopotential datum to which all geodetic coordinates and derived coordinates within the NSRS will be referenced. The new reference frames will rely primarily on Global Navigation Satellite Systems (GNSS), such as the Global Positioning System (GPS), as well as on a gravimetric geoid model resulting from the Gravity for the Redefinition of the American Vertical Datum (GRAV-D) Project. The modernized NSRS will be easier to access and maintain than the existing NSRS, which relies on physical survey marks that deteriorate over time and will result in new, more accurate, time-tagged geodetic coordinates (i.e., latitude, longitude, ellipsoid height, orthometric height, acceleration of gravity, deflections of the vertical, and others) at all geodetic control points within the NSRS. Additionally, coordinates will be estimated within these frames and datum at five-year reference epochs from the time-tagged coordinates, beginning with 2020.00. Initial completion and rollout of the NSRS modernization is expected to occur between 2022 and 2025, with additional support tools and services rolled out in subsequent years.

**DATES:** The modernization of the NSRS will occur between 2022 and 2025, with the release of additional tools and services occurring between 3 and 5 years later.

**ADDRESSES:** National Geodetic Survey, 1315 East-West Highway, Silver Spring, MD 20910.

**FOR FURTHER INFORMATION CONTACT:** Dr. Dru Smith, NSRS Modernization Manager, by email at [dru.smith@noaa.gov](mailto:dru.smith@noaa.gov), phone at (240) 533-9654, or mail at NOAA/NOS/NGS 1315 East-

West Highway, Silver Spring, MD 20910.

**SUPPLEMENTARY INFORMATION:** The modernization of the NSRS is designed to improve the accuracy of federal geodetic control. For over 200 years, NGS and its predecessor agencies, dating back to the founding of the Survey of the Coast in 1807, have been the stewards of the geodetic infrastructure—the NSRS—of the United States. As technology and scientific knowledge advance, NGS occasionally modernizes the NSRS. This announcement reflects part of the latest modernization effort.

The last significant modernization of the NSRS resulted in the creation of the original North American Datum of 1983 (54 FR 25318) and the North American Vertical Datum of 1988 (58 FR 34245). These datums were defined before the widespread use of GPS and GNSS and were determined using classical geodetic measurement techniques. Over the years, minor corrections to and expansion of the NSRS occurred; however, no significant update was possible until now. Through modern geodetic surveying technology, extensive data collection initiatives, and advances in scientific knowledge, a more accurate, modern NSRS is possible. The new frames and datum shall be known as the “North American Terrestrial Reference Frame of 2022,” the “Pacific Terrestrial Reference Frame of 2022,” the “Caribbean Terrestrial Reference Frame of 2022,” the “Mariana Terrestrial Reference Frame of 2022,” and the “North American-Pacific Geopotential Datum of 2022,” and may be referred to as “NATRF2022,” “PATRF2022,” “CATRF2022,” “MATRF2022,” and “NAPGD2022,” respectively. In order to accustom users to a time-dependent NSRS, NGS will also be estimating, and providing to the public, coordinates on geodetic control points at five-year reference epochs.

Additional information regarding the modernization of the NSRS may be found at <https://geodesy.noaa.gov/datums/newdatums/index.shtml>.

**Authority:** Coast and Geodetic Survey Act of 1947, 33 U.S.C. 883a *et seq.*
