II. Discussion

On July 2, 2020, the NRC solicited comments on three draft interim staff guidance documents (ISGs) that propose changes to the NRC's subsequent license renewal guidance documents (85 FR 39938). The purpose of the ISGs is to incorporate lessons learned from the NRC staff's safety reviews of the first three Subsequent License Renewal Applications (SLRAs) for Turkey Point Nuclear Generating Units 3 and 4, Peach Bottom Atomic Power Station, Units 2 and 3, and Surry Power Station, Units 1 and 2. Specifically, the ISGs revise guidance contained in NUREG–2191, “Generic Aging Lessons Learned for Subsequent License Renewal (GALL–SLR) Report,” and NUREG 2192, “Standard Review Plan for Review of Subsequent License Renewal Applications for Nuclear Power Plants.” NUREG–2191 and NUREG–2192 were published in July 2017 and are not scheduled to be updated for several years. The proposed changes to these documents are contained in the three draft ISGs that update aging management criteria for mechanical, structures, and electrical portions of the guidance. Several aging management review (AMR) line items were inadvertently omitted from the draft mechanical ISG. These omitted AMR line items are provided in an errata document. The public comment period was originally scheduled to close on August 3, 2020. The NRC has decided to extend the public comment period on this document until August 10, 2020, to allow more time for members of the public to submit their comments.
